3. Volunteer requirement.

The applicant is required to complete a total of 40 hours of volunteer work as a prerequisite. Thirty hours completed in a patient care related activity and ten hours completed within a sonography department. The objectives of these requirements are to ensure the applicant finds themselves well suited to working in the field with sick patients and to ensure they have a good understanding of what the day in the life of a sonographer looks like.

While the program is open to a wide variety of sites to complete this volunteer experience, it is the applicant's responsibility to secure placement and complete the required hours. Documentation of volunteer hours can be documented with a letter from the sponsoring site describing the dates, hours, and duties performed by the applicant. For those who work in healthcare, documentation of hours worked in form of pay statement can satisfy the 30-hour patient care requirement. This requirement can present challenges due to institutional policies regarding patient confidentiality, so make sure to plan accordingly.
