SPOKANE COMMUNITY COLLEGE NURSING DIVISION

STUDENT HANDBOOK 2018 - 2020

1. INTRODUCTION

Note: Changes can occur in any policy or guideline, including date of implementation, at any time. If this occurs, affected students will be notified through the student through the Spokane Community College (SCC) learning management system – CANVAS, via posting announcements and in class announcements.

1.1 Purpose of Handbook

The SCC Nursing Division Student Handbook explains the policies and guidelines of the Nursing Program. Students are responsible for familiarizing themselves with the handbook, as faculty will refer to it throughout the program. Students need to sign and submit the student contract, located on the last page of this document, indicating that they have read and understood all aspects of the handbook. The signed and completed “Student Signed Contract” page must be uploaded into American Data Bank on the first day of each academic quarter.

Brief History of the Nursing Program

The Practical Nursing Program (PN) began in 1950 at Spokane Technical and Vocational School in what is now Building 1 on Mission Street. The Associate Degree Program (ADN) began in 1970 at Spokane Community College with thirty enrolled students and three full-time faculty. This was in response to a national trend initiated by nursing leader Mildred Montague to place nursing education in collegiate settings, specifically community colleges. During this time, the Nursing Department was comprised of two separate programs, the PN and ADN tracks. The PN program consisted of four quarters and the ADN of six quarters, with admission restricted to Fall Quarter.

Nursing faculty revised the curriculum in 1985, instituting a ladder concept that facilitated progression from LPN to RN and resulted in admissions during both Fall and Spring quarters. In 1987, the Upward Mobility track was added, which allowed practicing LPNs to complete their RN degree. In 1999, an articulation agreement was developed with Washington State University’s College of Nursing to create a bridge enabling Associate Degree graduates to complete their Bachelors of Nursing Science. In 2008, SCC developed a simulation and learning laboratory to enhance student performance. In 2014, the faculty explored implementing concept based curriculum which was implemented in fall of 2016.
Accreditation/Approval

The Nursing Program is approved by the Washington State Care Quality Assurance Commission, 310 Israel Rd, Tumwater, WA 98501, and is fully accredited as of November 2011 by the Accreditation Commission for Education in Nursing (ACEN) (formerly the NLNAC), 3343 Peachtree Road NE, Suite 850 Atlanta, GA 30326.

1.2 Overview of the Nursing Program

Purpose

SCC’s Nursing Program provides students who have completed their prerequisites in nursing with the opportunity to advance their education in the nursing profession as registered nurses. The curriculum supports the required knowledge base. SCC encourages diversity by actively recruiting both traditional and non-traditional students.

The Nursing Program curriculum uses the concept based approach to learning which allows for a focus on the understanding of broad concepts that are applied to specific exemplars. Students learn to recognize features of a condition and apply what they have learned to a variety of situations. Students are introduced to learning material prior to class. Classroom time focuses on interactive learning, where the student deepens their understanding of the content through discussion with peers and problem-solving activities facilitated by instructors.

Mission Statement

SCC’s Nursing Program meets community needs by preparing graduates for entry-level practice in a variety of healthcare settings. The Nursing Program offers quality, student-centered education, emphasizing critical thinking skills, clinical reasoning, patient-centered care, and lifelong learning. Nursing students are provided with the opportunity to succeed in a supported environment that enhances individual and professional growth through academic, personal and professional development. Nursing graduates are well prepared to transfer their nursing degree credits in pursuit of their next step in their educational plan. The nursing program reflects SCC’s Mission in its support of a diverse community of adult learners.

Vision

The SCC Registered Nurse Program aims to:

- Utilize and expand on students’ previous knowledge and life experiences with education and further acquisition of knowledge
- Bridge conceptual practice models with physical healthcare work environments
- Foster scientific inquiry and research to achieve evidenced-based care
- Develop nurse leaders and overall professionalism by inspiring a passion for excellence through interdisciplinary collaboration, teamwork, and the effective utilization of resources and technology
• Promote lifelong learning

Additionally, SCC’s Nursing Program emphasizes SCC’s Student Learning Outcomes:

The Student Learning Outcomes Initiative at Spokane Community College is committed to enriching the educational environment so that the power and growth of learning are valued by all members of the college. We are dedicated to seeing our students demonstrate the following critical Student Learning Abilities as they relate to our institution and the larger community. SCC faculty has identified four ability areas that we believe all students need to succeed beyond their formal education: responsibility, communications, critical thinking, and global awareness.

• **Responsibility:** Students will develop the ability to recognize, understand and accept ownership for their learning by self-assessing, demonstrating, and evaluating behaviors that support the learning situation.

• **Communication (oral and written):** Students will demonstrate the ability to create meaning between themselves and their audience; learn to listen, read, speak, and write effectively using graphics, electronic media, computers, and quantified data.

• **Critical Thinking:** Critical thinking is the purposeful and self-regulatory process of conceptualizing, interpreting, applying, analyzing, synthesizing, and evaluating information gathered from or generated by observation, experience, reflection, reasoning, or communication as a guide to belief and action.

• **Global Awareness:** Students will demonstrate an awareness and appreciation of the world; its scientific complexity, its social diversity, and its artistic variety.

The college has identified four core themes to further define the mission which are used to evaluate mission fulfillment.

• **Workforce Development**
  SCC’s professional technical certificate and degree programs are industry standard, preparing students for entry-level positions in their discipline.

• **Academic Transfer**
  Students enrolled in Academic Transfer courses are well prepared and successful as they transfer their coursework and/or Associate degrees in pursuit of the next step in their education plan.

• **College Readiness**
  College Readiness programs meet the needs of students and prepare them for college-level courses while empowering them to succeed academically, personally, and professionally.

• **Student Success**
  Students are provided with the opportunity to succeed in a supported environment that enhances individual and professional growth through academic, personal and professional development.
1.3 Philosophy

The Nursing Program at SCC operates in accordance with the mission and values of SCC and the Community Colleges of Spokane (CCS), District 17. The faculty believes that it is the responsibility of the Nursing Program to provide equal opportunities for all persons through lifelong learning. Furthermore, the Nursing Program provides students with the knowledge and skills to become professional and safe nurses in the ever-changing healthcare environment.

Nursing is an applied science that includes theory-based courses and practical application of knowledge. Professional nursing practice is grounded in the social, biological and the physical sciences. Nurses possess a unique body of knowledge based on critical thinking and reasoning; utilization of the nursing process; principles of caring and collaboration; evidence-based scientific and behavioral knowledge; accountability and integrity; and teaching and learning in meeting the needs of patients. SCC’s Nursing Program prepares each student to care for diverse individuals, families, and communities across the lifespan in a variety of inpatient, ambulatory, and community-based settings.

Central to SCC’s nursing philosophy is caring and collaboration. Each patient is viewed as a unique human being with innate dignity and worth. Nurses manage care through prioritization based on the principles of delegation, supervision, resource management, and information technology for patients in a variety of settings. The faculty believes nurses create partnerships with patients that are the source of control in providing compassionate care based on respect for the patient's preferences, values, and needs. Furthermore, nurses coordinate care between the patient and other members of the healthcare team in order to achieve optimal patient, societal, and organizational outcomes. Nurses demonstrate effective clinical decision-making through the utilization of current evidence-based practice and clinical judgment; this ensures patient, staff, and system safety.

Evidence-based practice is a fundamental component of providing optimal care. Nurses need to become proficient in acquiring knowledge and information literacy as well as applying best practices. The Nursing Program incorporates the Institute of Medicine Report, “The Future of Nursing: Leading Change, Advancing Health” (2010), which emphasizes the need for quality, safety, education, and knowledge across the health care system (QSEN, 2014). The faculty values continuous improvement in clinical practice as a central component of lifelong learning, acquisition of new knowledge and patient-centered care. The program participates in on-going evaluation and quality improvement that contribute to care and patient outcomes.

The faculty believes that integrity and accountability are integral components in the performance of safe care, where vigilance and monitoring of student and faculty performance are critical to providing patient-centered care. Faculty believes that students need the tools to discuss and actualize the impact of national patient safety resources, initiatives, and regulations. The program promotes a just culture within the learning environment and encourages open communication strategies, error reporting, and remediation.

Based on the theories of Malcom Knowles, the faculty acknowledges that nursing education is an active, continuous process manifested in psychosocial, developmental, and measurable
changes in student behavior. Motivation, attitude, and abilities are essential components of effective student learning. The teaching and learning process is a shared activity between faculty and students. Faculty strives to recognize and foster the unique talents of every student while encouraging students to take responsibility for directing their own learning.

Nursing education is a dynamic process that promotes competence, independence and collaboration to improve the quality of health care. Faculty are committed to develop individualized teaching methodologies that facilitate student learning and skills needed to be safe novice professional nurses in a rapidly evolving healthcare environment. The curriculum allows graduates to embrace lifelong learning and move from one level to the next, including advancement to the Bachelor of Science, Masters, or Doctoral Degree in Nursing.

Spokane Community College Nursing Program Graduate Outcomes:

- Performance on NCLEX-RN will be at or above 80%.
- Program completion rate will be at or above 70%.
- 80% of graduates who respond will report that they were satisfied with their education on the Graduate Satisfaction Survey at 6-12 months post-graduation.
- 85% of employers who respond will report being satisfied with our graduates’ performance on the Employer Satisfaction Survey at 6-12 months post-graduation.
- 80% of graduates from the SCC nursing program will be employed in the field of nursing within 12 months of graduation.

Spokane Community College Nursing Program Learning Outcomes:

- **Professionalism**: The graduate will demonstrate accountability and integrity while utilizing legal standards and ethical values that govern professional nursing practice.
- **Collaboration**: The graduate will coordinate care with the patient, significant support systems, and other members of the healthcare team to achieve optimal patient and organizational outcomes.
- **Clinical Decision Making**: The graduate will utilize best current evidence and clinical judgment to ensure patient, staff and system safety in a variety of healthcare settings.
- **Caring**: The graduate will create partnerships with the patient as the source of control in providing compassionate care based on respect for the patient’s preferences, values, and needs.
- **Management of Care**: The graduate will prioritize care based on principles of delegation, supervision, resource management, and information technology for patients in a variety of settings.
Standards of Nursing

I. Washington Administrative Code (WAC)

The Washington Administrative Code (WAC) is “regulations of executive branch agencies that are issued by authority of statutes” (Washington Administrative Code). Like legislation and the Constitution, regulations are a source of primary law in Washington State. The WAC codifies the regulations and arranges them by subject or agency. The online version of the WAC is updated twice a month and can be accessed at RCW: Revised Code of Washington (www.apps.leg.wa.gov/wac/).

The law relating to nursing care sets forth the legal standard of care for healthcare professionals in the state of Washington. Health care professionals, including registered nurses, licensed practical nurses, certified nurse assistants and nurse technicians, are held to these laws and can be disciplined for non-compliance according to the Uniform Disciplinary Act. Nurses need to be aware of—and follow—the law. The online version can be accessed at http://www.doh.wa.gov/portals/1/Documents/2900/uda.pdf. Comments, concerns and/or complaints may be initiated electronically at hpqa.csc@doh.wa.gov or by mail at Board of Nursing, Washington State Nursing, P.O. Box 47864, Olympia, WA 98504-786; in person at 111 Israel Rd SE, Tumwater, WA 98501; or by phone 360.236.4700 or fax at 360.236.4818.

II. American Nurses Association (ANA) Code of Ethics

The American Nurses Association developed the profession’s code for ethics called the Code of Ethics for Nurses. ANA Nursing Ethics is part of The Center for Ethics and Human Rights, which maintains the ANA Nursing Code of Ethics.

As a registered nurse, you will be held to this standard of practice, which will guide your ethical conduct and assist you in discharging your professional responsibilities to the public, other members of the health team, and to the profession. It is expected that as a graduate of the Nursing Program you will model your practice based upon the Code of Ethics as outlined below:

- **Provision 1**: The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.
- **Provision 2**: The nurse’s primary commitment is to the patient, whether an individual, family, group, community or population.
- **Provision 3**: The nurse promotes, advocates for, and protects the rights, health, and safety of the patient.
- **Provision 4**: The nurse has authority, accountability, and responsibility for nursing practice; makes decisions; and takes action consistent with the obligation to promote health and to provide optimal care.
- **Provision 5**: The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth.
Provision 6: The nurse, through individual and collective effort, establishes, maintains, and improves the ethical environment of the work setting and conditions of employment that are conducive to safe, quality health care.

Provision 7: The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development and the generation of both nursing and health policy.

Provision 8: The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities.

Provision 9: The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession and integrate principles of social justice into nursing and health policy.

2. METHODS OF INSTRUCTION

2.1 Instructional Settings

SCC incorporates a variety of teaching strategies to create a positive learning environment within the following instructional settings:

- Classroom: Students are expected to actively participate in the classroom experience. Theory courses provide students a base of knowledge to build upon as they progress each quarter.
- Hybrid: Students will attend required on campus classes as well as complete assigned online activities and assignments per the syllabus and course calendar
- Nursing Lab: Learning nursing skills in a laboratory is an essential part of the curriculum. Prior to caring for patients in the clinical setting, students practice in the lab to facilitate learning and safety. It is here that students are introduced to skills, concepts and procedures they will apply in their clinical settings. Students utilize the nursing skills lab to practice basic advanced nursing skills during faculty supervised classes and demonstrations as well as during independent practice time. Simulation is included as a learning tool throughout the program.
- Clinical: The clinical component of the program gives students the opportunity to put into practice both lab skills and theory content. Students provide patient care through clinical practice in a variety of settings in Spokane and the surrounding areas. SCC nursing faculty supervises clinical rotations.

3. CCS POLICIES ON NONDISCRIMINATION

The Community Colleges of Spokane, both as a public institution of higher education and as an employer, recognizes its responsibility in providing cultural and social leadership and to uphold the laws of the United States and the state of Washington regarding nondiscrimination. In that regard, the fostering and developing of values that promote open-mindedness, awareness,
sensitivity, and respect for differences including perspectives of those of a different race, color, sex, religion, creed, age, marital status, national origin, sexual orientation, disability, and veteran status will be encouraged.

The understanding of social and cultural traditions of different minority groups, women and disabled persons in both classroom and working environments is a fundamental role of this college district.

Prejudice and bigotry; including racism, sexism and any other bias that creates barriers, perpetuates stereotypes or promotes ignorance, is contrary to the mission and obligations of the community colleges and has no value or place in this academic community.

Confirmed violations of this policy by any student or academic, classified or administrative employee may lead to corrective discipline including suspension and dismissal.

3.1 Persons with Disabilities Statement

In accordance with the Americans with Disabilities Act and the Rehabilitation Act of 1973, accommodations for students with disabilities will be considered at the student’s request. The student will be required to register with the Disability Support Services office and provide documentation of disability. Once the DSS Manager qualifies the student as having a disability, requested accommodations will be considered. Accommodations for the classroom, laboratory, or clinical setting will be considered according to reasonableness. The disability office will provide documentation to nursing faculty of said accommodation. Accommodations will not be considered without official documentation from the disability office. Accommodations that compromise patient care, or that fundamentally alter the nature of the program or activity, are not considered to be reasonable. A student denied accommodation might request an individualized determination to assure that the denial is not a result of disability discrimination by contacting the Manager of Disability Support Services and Testing at (509) 533-7498. Procedures for appeal are outlined in the SCC Center for Students with Disabilities Student Handbook. http://www.scc.spokane.edu/Resources/DisabilityServices.aspx

3.2 Veterans

SCC appreciates students who have served our country and understands that students with military experience may face unique challenges in completing their educational goals. The Veteran’s One Stop can be found in the Lair Student Center (Building 6, Room 0112), or can be contacted at (509) 533-7027 or (509) 533-7274. Additionally, lists of faculty who are registered as “Veteran Friendly Contacts” are posted in all buildings on campus. More information, including a complete list of Veteran Friendly Contacts, can be found at: http://www.scc.spokane.edu/?vetaffairs.

3.3 Rights and Responsibilities

Classroom Conduct (WAC 132Q-30-101)
Admission to the Nursing Program within CCS carries with it the assumption that students will conduct themselves as responsible members of the academic community. This includes an expectation that students will obey the law; comply with policies, procedures, and rules of the district, the colleges, and their departments; maintain a high standard of integrity and honesty; and respect the rights, privileges, and property of other members of CCS.

Classroom Conduct (WAC 132Q-30-500)

- Faculty members have the authority to take appropriate action to maintain order and proper conduct in the classroom and to maintain the effective cooperation of students in fulfilling the objectives of the course.

- Bringing any person, thing or object to a teaching and learning environment that may disrupt the environment or cause a safety or health hazard, without the express approval of the faculty member, is expressly prohibited.

- Faculty members or college administrators have the right to suspend any student from any single class or program, up to three instructional days, if the student’s misconduct creates disruption to the point that is difficult or impossible to maintain the decorum of the class, program or the learning and teaching environment. The faculty member or college administrator shall report this suspension to the chief student services officer and in collaboration with the nursing administrator may set conditions for the student upon return to the class or program.

- The student may appeal the classroom suspension to the dean of student services who may authorize an earlier return by the student only after consultation with the faculty member or appropriate administrator. The chief student services officer’s decision is final.

What constitutes disruptive behavior?

Examples include anything that prevents an instructor from effectively conveying information to the class, such as:

- Sleeping
- Rudeness to peers, faculty, staff, or guest speakers
- Talking in class
- Unwanted physical contact
- Any form of sexual harassment toward others
- Offensive personal hygiene
- Excessive questioning or commenting
- General disruption
- Personal use of cell phones/texting

Disciplinary Action for classroom, lab, and clinical setting (WAC 132Q-30-400)
Discuss with student, instructor, department chair, and Associate Dean of Nursing the incident that occurred and, if warranted, forward for college discipline. A Student Conduct Incident Report will be completed and placed in their file (see appendix). Sanctions that may be imposed include:

- Disciplinary warning
- Reprimand
- Disciplinary probation
- Dismissal

Drugs and drug paraphernalia banned (WAC 132Q-30-228)

Use, possession, manufacture, or distribution of marijuana, narcotics, or other controlled substances, and drug paraphernalia except as expressly permitted by federal, state, and local law.

For additional information, see the Washington State Community College District #17, Rules of Conduct and Procedures of Enforcement and Summary Suspension Rules, or the college catalog.

4. PROGRAM POLICIES

4.1 Dress Code Policies

**College Classroom**
Students will wear appropriate dress for all college classes. Proper attire and appearance enhances personal credibility and that of Spokane Community College with patients, their families, and the facility personnel.

**Clinical and Lab**
Students are expected to dress in a professional manner at all times and uniforms are to be worn for clinical and lab classes. The SCC nursing uniform must be worn while visiting clinical facilities when researching clinical assignments. The uniform policy will be handed out during orientation; only the specific style numbers and colors with SCC logo are permitted.

SCC nursing students bear the responsibility to conduct themselves and dress in a manner that reflects professionalism. Cell phones or pagers are permitted only if the clinical policy permits.

Students not following these dress code requirements will be sent home from clinical or lab:

- Clean, neat and the proper sized garments with SCC logo scrubs
- SCC blue scrub jacket (optional)
- Photo I.D. must be worn at all times
• Wedding rings allowed but no large stones in rings, which can catch on linens or scratch patients
• Plain posts may be worn for pierced ears. No other visible body jewelry or facial piercings are allowed
• Hair must be neat, clean, and off the collar or tied back (plain elastic hair accessory)
• Hair color must be a natural color and facial hair must be neat and trimmed
• Makeup must be applied in a professional manner
• Socks must be a solid color of either white, navy blue, or black
• A solid color blue or white shirt, with short/long sleeves may be worn under SCC scrub top
• Shoes must be a plain white or plain black (coupled with black or navy blue socks), impervious material, with closed toe and back and minimal logos
• Nails must be natural, unpolished, trimmed, and short
• Body tattooing must be covered with natural color bandages or makeup
• Cologne, perfume, or offensive odors (such as smoke smell or body odor) are not permitted
• Chewing gum is not permitted.

Psychiatric Mental Health
Students do not wear their uniform on the psychiatric units. Professional attire is required—casual attire such as jeans, shorts, sweatshirts, t-shirts, and sandals is not permitted

4.2 Math Policies

• Math exams will begin on the first day of class for all quarters except the first quarter of the program. The math exam for the first quarter will be arranged per the instructor
• Math related to intravenous fluid and medication administration is included in math exam given at the beginning of the fourth quarter.
• Students must pass the math test each quarter at 100%
• Students who fail to achieve 100% on the second exam will retake a third complete exam; failure to obtain 100% on the third exam will result in failure for the course
• Students must wait 24 hours between attempting the next proctored exam
• The final math test must be completed by the 10th day of the quarter, with the exception of the first quarter of the program.
• You may not pass medications in the clinical setting if you have not successfully passed the math test with 100%; it is the student’s responsibility to inform the clinical instructor of their status of the math test.

Guidelines for Math Problems

○ Clinical calculations are included on nursing exams. A non-programmable calculator is allowed. Rounding rules for clinical calculations are as follows:
1. If the answer is less than one (1), take it out to the thousandth place (3 places) and round to the hundredth place (2 places).

2. If the answer is greater than one (1), take it out to the hundredth place (2 places) and round to the tenth place (1 place).

3. If the problem is a time problem with an answer such as 3.462 hours, you have to figure minutes, after taking the answer out to three places. Do not round until the end. (Ex: 0.462 X 60 = 27.72 = 28 minutes)

4. For tablets, if you have a problem that results in an answer of 0.5 tablet, do not round up. If there is a question that results in a partial tablet(s) tablets may only be cut when they are scored.

5. Capsules are different. You cannot give a part of a capsule; therefore capsules have to be a whole number.

6. For converting lbs to kg for weight based medications, the answer should be carried out to the hundredth position and not rounded until the end of the problem. Rounding early in the problem results in at least double rounding and will give you the wrong answer in the end. Note: the only acceptable conversion from lbs to kgs is to divide the lbs by 2.2 or from kg to lbs is to multiple the kgs by 2.2.

7. For IV fluids being administered by gravity (gtts/min), the number of gtts must be expressed as a whole number. Therefore, you would round to the nearest whole drop. (Ex: 34.5 = 35 gtts/min, 38.4 = 38 gtts/min)

8. For IV fluids being administered by an IV pump (ml/hr) the number of mls is expressed to the nearest tenth. Therefore, you would round to the nearest tenth. (Ex: 21.67 = 21.7 ml/hour or 21.42 = 21.4 ml/hr)

9. Pediatric medications require precise calculations. Therefore, regular rounding rules apply for the rates of IV fluids to be administered by an IV pump to patients under age 12 or weighing less than 65 lbs. (Ex: 24.58 ml/hr = 24.6 ml/hr, 52.32 ml/hr = 52.3 ml/hr)

10. Do not include a trailing zero. (Ex: 12.0ml would simply be expressed as 12ml)

11. Be sure to include a leading zero for all numbers less than one. (Ex: .25ml should be expressed as 0.25ml)

4.3 Student Conduct Expectations

Students will maintain a professional attitude at all times and conduct themselves as mature adults. Instructors, as well as hospital or college staff, are not responsible for unprofessional or unsafe student behavior. Instructors can expect reasonable and acceptable student behavior at all times, in the classroom and at clinical sites. All code of conduct information can be found on the CCS website: http://catalog.spokane.edu/StudentRights.aspx?page=PV1

As adult learners, students enrolled in the Nursing Program are expected to behave in the following ways:

- Follow all policies outlined in the Nursing Student Handbook and SCC College Catalog
- Attend clinical, lecture and lab as scheduled
• Practice both newly- and formerly-acquired skills as well as apply critical thinking to scenarios in the nursing lab
• Treat patients and family members, faculty, peers, clinical facility and school personnel with utmost respect and dignity
• Maintain confidentiality for patients, their family members, and other clinical situations according to HIPAA guidelines and security policies as specified by clinical agencies
• Participate in the clinical simulation exercises specific to course in which student is enrolled
• Practice in the clinical setting using legal and ethical principles consistent with the scope of nursing practice
• Follow the policies of the SCC Nursing Program and applicable clinical agencies.

The following are violations considered just cause for **immediate suspension**:

• Stealing, willfully destroying or damaging any property of patients, other employees or of the organization
• Disobedience and insubordination
• Disorderly conduct at clinical or any behavior that results in the rescinding of the facility’s contract with the SCC Nursing Program
• Duties performed under the influence of alcohol, drugs and/or other substances.
• Gross negligence in performance of duty
• Release of privileged information or violation of HIPPA
• Any dishonesty, cheating, or falsifying documents
• Unprofessional or irresponsible behavior.

**Additional Information**

Students are responsible for keeping SCC, the current Web Platform, and their instructors advised of changes of name, address or telephone number. This information is vital if an instructor, the College, or a clinical facility must contact a student. Student information forms can be found on the SCC website.

Students have the right to disagree with a clinical or lecture grade. The concern to be addressed using the SCC procedure for Addressing Student Concerns based the SCC college policy [http://catalog.spokane.edu/StudentRights.aspx](http://catalog.spokane.edu/StudentRights.aspx).

Students must tactfully decline any gifts or tips for services from any patient. Gifts to faculty by students are discouraged.

**4.4 Academic Integrity**

Academic integrity is taken very seriously in the SCC Nursing Program. Students may **not** copy or distribute any intellectual property of the course instructor. This includes but is not limited to: powerpoint presentations, handouts, and assignments. In order to maintain integrity of intellectual property, audio and video recording and still photography are not allowed in class.
Students are expected to review and comply with WAC 132Q-10 “Standards of Conduct for Students” and all associated WAC sections. Plagiarism, cheating, and any other violations of the Standards of Conduct for students will be reported to the SCC Student Conduct Officer.

Sanctions for academic integrity violations may include receiving a failing grade for the assignment or examination, or possibly a failing grade for the course. In some cases, the violation may also lead to the student’s dismissal from the Nursing Program and/or the college.

### 4.5 Dismissal Policy

Course failure results when the student fails to achieve all of the behaviors on the clinical evaluation tool, when the student has unsatisfactory performance in the laboratory learning objectives, or when the student does not have a passing grade in the theory portion of the course (78% or 2.0 GPA). Additionally, students who fail to meet the clinical requirements for CDC immunizations and background check standards for clinical access before the clinical rotation begins and the due date required by the Clinical Placement Manager/facility will be dismissed from the clinical portion of the course and therefore, will not successfully complete the course with a 78% or 2.0 GPA. Such students will then need to look to the Re-admission Policy for re-entry. See “course failure policy” in the appendix.

It is the student’s responsibility to keep track of his/her clinical/lab performance and theory grades on the SCC Learning Management System. If a student’s score is less than 2.0 or 78% in a nursing course at midterm, the faculty member will notify the student of the failing grade. The faculty member will attempt to arrange a meeting to address the student’s needs for academic success and provide them with a Student Academic Progress Report. The student is responsible for adhering to the plan of action outlined in the Student Academic Progress Report, see appendix.

However, a maximum of **one nursing course** may be repeated in the Nursing Program.

Any student who achieves a final grade below 2.0 in a nursing course will be dismissed from the nursing program at that time. See Re-admission Policy in the appendix.

In instances where a student is dismissed due to behavior considered “Just Cause for Immediate Suspension and Dismissal” as identified in each clinical evaluation tool, the faculty will determine, on a case-by-case basis, whether the dismissal is permanent with no option to return to the nursing program.

Dismissal from the Nursing Program is not an expulsion from CCS. Dismissal from the program includes dismissal from all nursing courses for the quarter. Students enrolled in dual numbered courses (Nurs/Phil 202, Nur/Phil 207, Nurs/Psych 106, Nurs/Psych 113), may complete those courses.
4.6 Withdrawal

If a student withdraws from the nursing program after the tenth day of the quarter and he/she is not passing any required nursing course (clinical, laboratory, theory), it will be considered a failure in terms of the SCC Nursing Re-admission Policy. All students wishing to withdraw from a nursing course must contact the Associate Dean of Nursing if they wish to withdraw or to determine if they are eligible to return to the program, and must complete the withdrawal documentation. It is important to refer to the current College catalog to be appraised of the timeline to drop a course.

4.7 Re-admission

Any eligible student achieving less than 2.0 in a nursing course, or who withdraws from the Nursing Program, may seek one re-admission. Re-admission is based on space available in the repeating course, consecutive courses with an emphasis on clinical space. A maximum of one nursing course may be repeated in the nursing program regardless of year or quarter.

If a student fails or withdraws the first quarter of the program, he/she must reapply through the competitive admissions process. Any other course after the first quarter of the program, the student must be placed on the advanced standing list with a return no later than two years. It is the student’s responsibility to contact the registrar to be placed onto the advanced placement list.

If a student fails N200 (Care of the Developing Family) or N203 (Care of the Mental Health Patient) in the first half of the quarter they will be allowed to complete the second course in the quarter. A failure also in the second half of the quarter will result in the student being ineligible to return to the program as the student has failed two courses in the program.

If the student is offered a slot in the correct quarter and the student declines one offer or fails to meet clinical requirements within one week of re-admission, then the student forfeits his/her right to advanced standing and will need to go through the competitive admissions process for re-entry into the nursing program starting in first quarter of the program.

A student will be allowed two attempts to complete SCC Nursing program. An attempt is either a failure of course or withdrawal from SCC Nursing Program.

4.8 Time Period for Completion of Program

Once enrolled in first quarter of Nursing program (NURS 101, NURS 102 & NUTRI 251), the student must complete the first year within three years. Once enrolled in the fourth quarter of Nursing program (NURS 200, NURS 201, NURS 202, NURS 203 & NURS 204), the student must complete the second year within three years.
4.9 Course Failure Policy

Spokane Community College
Nursing Program
Academic Standards and Course Failure Policy

Introduction:

Spokane Community College Nursing Program students shall achieve established academic standards to successfully complete the Nursing Program including: a math test; a series of non-associated classes which include Nutrition, Psychosocial Issues I & II; Pharmacology, and Ethics and Policy in Healthcare I; and series of associated classes, which include a combination of theory, skills labs, and clinical practicums. The following course failure procedures apply if a student fails to meet the established academic standards.

Academic Standards Math Exam:

Students shall pass the math exam with a score of 100% to progress in the Nursing Program. A student who fails to pass the math exam after three (3) attempts will be dismissed from the attending quarter. If the student wishes to continue in the program after three (3) unsuccessful math exam attempts, which is considered a “first fail,” the student must follow the College’s readmission process. Students will only receive one opportunity to seek readmission to the Nursing Program after a first fail.

Academic Standards Coursework, Clinical Practicums, and Skills Labs:

A. Inter-relationship of Courses:

Theory, skill labs, and clinical practicum courses are academically interrelated. Clinical practicum and skills labs associated with a theory course provide students the opportunity to practice and demonstrate implementation of content presented in the theory course. The Nursing Program faculty members are responsible for evaluation of student performance to determine if the student has developed an adequate foundation of knowledge to permit the student to progress without interruption in the Program. The student will receive the grade that they have earned in each course each time a course is attempted. When a student fails to achieve a 2.0 or higher in a nursing theory class, or does not receive a “pass” in a skills lab or practicum course, the student will need to repeat all three courses, theory, skills lab, and clinical practicum, regardless of the grades the student achieved in the related classes. For example, if a student achieves a 3.6 in theory, a pass in clinical practicum, and a fail in skills lab, the student will have to retake theory, practicum and skills lab despite his/her success in two of the three courses.

B. Academic Standard Criteria:
Students enrolled in the Nursing Program must complete all nursing theory courses with a grade of 78% or 2.0 or higher and all skills lab and clinical practicum courses with a “Pass” in order to progress without interruption in the Program.

Criteria for successful completion of a course are identified in the syllabus for each course and are as follows:

In order to pass this course, each student must successfully achieve the following:

1. A minimum of 78% of total possible points within this course AND
2. A minimum cumulative grade of 78% on all quizzes, unit tests, and final
3. Students must demonstrate competency in the performance of identified skills each quarter as part of the clinical requirement.
4. Students must demonstrate competency in the performance of the identified core competencies in the clinical and lab skill evaluation tools and the course objectives.

C. Midterm Failure Procedures:

It is the student’s responsibility to keep track of his/her clinical/lab performance and theory grades on the SCC Learning Management System. If a student scores less than 2.0 or 78% in a nursing course at midterm, the faculty member will notify the student of the failing grade. The faculty member will attempt to contact the student via email and arrange a meeting to address the student’s needs for academic success and provide them with a Student Academic Progress form. The student is expected to cooperate in coordination of the meeting and is expected to attend and participate in the meeting. If after three attempts to contact the student by email the student fails to respond, the instructor will have met his/her responsibility to coordinate the meeting. During the meeting the instructor and student will review and discuss the plan of action outlined in the Student Academic Progress form, if the student has any questions or needs clarification, it is the student’s responsibility to seek and obtain clarification from the Instructor. The instructor and the student will sign the report once an action plan has been discussed. The student is responsible for adhering to the plan of action outlined in the Student Academic Progress Report. All students will receive written evaluations and conferences regarding clinical performance at midterm and at the end of clinical course by their clinical instructor. Final evaluations will be shared with the student by the clinical instructor, signed by both student and instructor, and then placed in the student’s file.

D. Final Failure Procedures

The faculty will attempt to contact the student via email, inform them of the failed grade, and arrange a meeting. The student is expected to cooperate in coordination of the meeting and is expected to attend and participate in the meeting. If after three attempts to contact the
student by email the student fails to respond, the instructor will have met his/her responsibility to coordinate the meeting. During the meeting, the faculty and student will meet and review, discuss, and sign the Student Failed Course form. If the student has any questions or needs clarification about the form, it is the student’s responsibility to seek and obtain clarification from the instructor. The faculty or Instructor will send a copy to the Dean of Nursing. The instructor will advise student to meet with the dean to discuss future program progression. The student is responsible for contacting the dean’s office to coordinate a meeting. The faculty will develop a plan to address identified learning needs of the student and to support the student’s future success. As explained above, because the courses in a quarter are closely related, the plan will include a requirement for student to repeat all associated courses from the quarter where the student was unsuccessful regardless of grade earned in the associated courses.

E. Opportunities to Repeat Courses and for Program Readmission:

1. Repeat Courses:

If a student fails a nursing course, the student may repeat that course and must repeat the associated courses. Students may repeat a nursing course a maximum of one time throughout the Nursing Program. A second failure results in dismissal from the program.

2. Readmission:

If a student fails the first quarter of the Nursing Program or fails the math exam after three attempts, the student will need to reapply to the Nursing Program. Nursing students shall only receive one opportunity for readmission into the Nursing Program.

*Note: To see the instructions on how to file a complaint, see section 7.7 and the forms in the appendix.*

Summary of Course Academic Standards and Course Failure Policy

- If student does not meet grade of 78% or 2.0, consistent with the course syllabus, student fails class
- If student does not meet a minimum cumulative grade of 78% on all quizzes, unit tests, and final, student fails class
- If student does not pass lab or clinical, student fails class
- If student does not pass the math exam with 100% proficiency after third attempt student fails class, but must reapply if they want to complete the program
- Student can only fail one course throughout the program
- Student may only repeat one course throughout the program* (note if Student fails an associated nursing course, then student will retake lab, clinical, and theory which is considered one repeat)
If student fails in the first quarter, student must reapply if they want to complete the program.

Student may only reapply a total of one time to the Nursing Program after either a first quarter failure or a math exam failure.

A student will be allowed 2 attempts to complete SCC Nursing program, an attempt is either a failure of course or withdrawal from SCC Nursing Program.

*Associated Nursing Courses include lab, clinical, and theory and if a student fails an associated Nursing Course, the student shall retake lab, clinical and theory which is considered one repeat.

- Quarter 1:
  - NURS 101
  - NURS 102
- Quarter 2:
  - NURS 104
  - NURS 105
- Quarter 3:
  - NURS 111
  - NURS 112
- Quarter 4:
  - NURS 200
  - NURS 201
  - NURS 203
  - NURS 204
- Quarter 5:
  - NUR205
  - NUR206
- Quarter 6:
  - Capstone NUR 208
  - Simulation NUR 210

Non Associated courses include the following and will not need to be repeated if the student receives a passing grade of 2.0/78%:

- Quarter 1:
  - Nutrition 251
- Quarter 2:
  - NUR 106 Psychosocial Issues I
  - NUR 110 Pharmacology
- Quarter 3:
  - NUR 113 Psychosocial Issues II
- Quarter 4:
  - NUR 202 Ethics and Policy in Healthcare I
- Quarter 5:
4.10 Clinical Medication Administration Policy

Nursing Students: Access and Administration of Medications Policy

POLICY STATEMENT:

Nursing students administer medications under the supervision of the clinical faculty or the Supervising Nurse.

Only Nursing Capstone Students have access to the automated dispensing cabinets.

Nursing students obtain medications directly from their Supervising Nurse.

Nursing Capstone Students access the automated dispensing cabinets to obtain non-controlled substance medications for patients. Nursing Capstone students are defined as Nursing Students who are assigned to a capstone experience on a designated unit as a final clinical experience prior to graduation.

IMPLEMENTATION:

1. Functions NOT permitted to be performed by nursing students: There are some medication administrations and monitoring skills that nursing students are not permitted to perform under any circumstances. These include the following situations:
   a. Confirm, release, or acknowledge medication orders in the electronic medication administration record
   b. Administer medications that are not confirmed or acknowledged in the electronic medication administration record
   c. Administer oral or parenteral chemotherapy
   d. Administer oral or parenteral controlled substances
   e. Administer conscious sedation or assume monitoring responsibility for patients undergoing procedural sedation
   f. Administer or adjust oxytocin for laboring or postpartum patients
   g. Administer or adjust medications that require advanced training (e.g., medications restricted to the critical care areas)
   h. Administer medications via an epidural or spinal catheter
   i. Peer check any medication dosing

2. Accessing electronic programs used to support medication administration (e.g., automated dispensing cabinets, electronic medication administration records):
Access to the electronic medication administration record is granted to Nursing Students and Nursing Capstone Students.

Access to the automated dispensing cabinets is granted to Nursing Capstone Students.

SCC Nursing program coordinator will provide Educational Services Coordinator at each clinical facility with the following information to obtain access to the applicable programs:

- Last name, first name, middle initial
- Last four digits of the social security number
- Name of facility and unit where student is placed
- Start and end dates for clinical experience
- Type of clinical experience (Nursing Senior Practicum Student or Nursing Student)

Prior to access and using the electronic medication administration record or the automated dispensing cabinet, the students complete required training.

Obtaining Medication Administration Supplies:

- Nursing students may obtain necessary medication administration supplies by accessing medication rooms and/or supply rooms.

Administration of Medications:

- Nursing Students administer medications to patients after ensuring the medication is correct for the patient.
- Nursing Students administer medications under the direct supervision of the clinical faculty until deemed competent to administer medications. Nursing Student competency is determined by the clinical faculty.
- Once deemed competent in medication administration, the Nursing Student may administer medications without direct supervision (see exceptions below related to Controlled Substances and High Risk Medications).
- Nursing Students utilize the electronic medication administration record to correctly identify patient, medication, and document medication administered.

Administration of high risk medications by all Nursing Students – Nursing Capstone Students:

- High risk medications include the following:
  - All heparin, warfarin, t-PA, low molecular weight heparin, bivalirudin, dabigatran, and other anticoagulants
  - All insulin formulations. This includes both SQ and IV insulin doses and all insulin IV infusions.
  - IV Sodium Chloride at concentrations greater than 0.9% (normal saline).

  - The supervising nurse obtains the high risk medication for the nursing student and the nursing student administers the medication only under the direct observation and supervision of the supervising nurse.

Medication Errors:
a. Following the discovery of a medication error, or in the event that a Student Nurse is involved in a medication error, the Student Nurse notifies:
   i. Patient's Assigned Nurse
   ii. Clinical Faculty
8. The Student Nurse completes an online event report (e.g., Quantros) together with the Supervising Nurse or Patient’s Assigned Nurse and clinical faculty.
9. The Student Nurse must also complete any additional reporting requirements as defined by their School of Nursing, see incident report in the appendix.

RATIONALE:
To provide consistency in accessing and administering medications by Nursing Students and ensure compliance with applicable hospital policies and Washington State Law. (See sample student medication administration policy in the appendix)

*See Appendix for facility specific medication administration policy.

4.11 Social Media Policy

Spokane Community College Nursing Program
Social Media Policy

In accordance with industry and profession standards, the Spokane Community College Nursing Program recognizes the need to adopt a policy in regards to student and faculty use of social media and social networking. This policy covers social media internet sites (Facebook, MySpace, Twitter, Google+, Instagram, LinkedIn, YouTube, blogs, and any other similar sites active now or in the future) as well as the use of personal electronic devices (smartphones, iPads, tablets, etc.). The following policy and Agreement regarding compliance with this Policy was created in accordance with the National Council of State Boards of Nursing (NCSBN) guidelines for the use of social media for nurses (National Council of State Boards of Nursing [NCSBN], 2012).

Policy Purpose:

- To assist students and faculty to have a mutual understanding of the proper use of social media as a professional nurse by providing standards, and expectations of behavior.
- To protect the privacy of all patients cared for by Spokane Community College Nursing students.
- To protect the integrity and respect of fellow students, nursing faculty, and Spokane Community College.
• This policy is not intended to interfere with the individual rights of a student or faculty member as protected by law.

Policy

• In consideration for participation in the Nursing Program which includes access to health care patients whose rights to privacy are governed by affiliate policies, and state and federal law, Spokane Community College Nursing Program students will be required to sign an “Agreement Regarding Use of Social Media” upon admission to the program. Student signature on the signature page of this document indicates acknowledgment and adherence to this social media policy.

• Terms of the Agreement include:
  o Student’s acknowledgment of training and introduction to patient privacy/HIPAA.
  o Student’s agreement to comply with local agency, state, and federal requirements concerning patient confidentiality and privacy per HIPAA rules when communicating to peers, friends, family, or the public via social media outlets.
  o Student’s agreement that a violation of such rules constitutes a breach of generally recognized standard of practice governing the nursing profession which student is pursuing as an educational goal. Such violations are processed under the Standards of Conduct for Students Chapter 132Q-10 WAC and may result in: student’s prohibition from clinical sites, student’s inability to successfully complete degree requirements, and student’s dismissal from the Nursing Program.
  o Student’s agreement that the use of personal mobile devices to take photographs of patients or any part of their medical record, with or without patient identifiers, is a violation of patient privacy and agreement to not engage in such behavior.
  o As a potential future nurse, student agrees to comply with the following expectations for nurses using social media as recommended by the NCSBN, 2012:
    ▪ Students must recognize that they have an ethical and legal obligation to maintain patient privacy and confidentiality at all times.
 Students must not transmit, by way of any electronic media, any patient-related information or image that is reasonably anticipated to violate patient rights to confidentiality or privacy or to otherwise degrade or embarrass the patient.

 Students must not share, post, or otherwise disseminate any information, including images, about a patient or information gained in the nurse-patient relationship with anyone unless there is a patient care related need to disclose the information or other legal obligation to do so.

 Students must not identify patients by name, or post or publish information that may lead to identification of a patient. Limiting access to postings through privacy settings is not sufficient to ensure privacy.

 Students must not refer to patients in a disparaging manner, even if they are not identified.

 Students must not take photos or videos of patients on personal devices, including mobile devices.

 Students must maintain professional boundaries in the use of electronic media.

 Students must consult with clinical agency policies or an appropriate leader within the organization for guidance regarding clinical agency-related postings governing patient confidentiality and the use of social media.

 Students must promptly report any identified breach of confidentiality or privacy. Student may anonymously report any suspected violation of a classmate or faculty member in order to fulfill the expectation of reporting breaches of confidentiality or privacy.

 Students must be aware of and comply with SCC and affiliate policies regarding use of SCC and affiliate-owned computers, cameras, and other electronic devices and use of personal devices in clinical agency sites.

 Students must not make disparaging remarks about affiliate staff, instructors or student colleagues.

  o Agreement that, as students, disparaging remarks regarding fellow students, the nursing program faculty, Spokane Community College, any clinical agency, or any clinical agency staff will be considered a violation.

  o Student’s acknowledgment and agreement that violation of this Policy is a breach of a generally recognized standard of practice governing the nursing profession which constitutes a violation of Community Colleges of Spokane’s Standards of Conduct for Students, WAC 132Q-10-210 (2). Violations of this
type are processed under the Standards of Conduct for Students Chapter 132Q-10 WAC and the possible consequences of such a violation, whether intentional or unintentional, include but are not limited to dismissal from the SCC Nursing program.

Spokane Community College Nursing Program
Agreement Regarding Use of Social Media

As a student of the Spokane Community College (“SCC”) Nursing Program, I understand that I will have access to health care patients, whose rights to privacy are governed by clinical agency policies, state law, and federal law. I understand and agree that maintaining patient confidentiality is a generally recognized standard of practice governing the nursing profession and agree to comply with this “Agreement Regarding the Use of Social Media” (“Agreement”) in the event I choose to participate in the use of social media. I acknowledge and agree that SCC has provided me with training on patient privacy and HIPAA. I understand the state and federal requirements concerning patient confidentiality and privacy, including the HIPAA rules.

This Agreement is made in consideration of the following:

I. **SCC Responsibilities:** SCC agrees to provide access to third-party clinical sites for students, including sites which may provide students with access to health care patients, to facilitate the student’s health care educational opportunities.

II. **Student Responsibilities:** Student agrees:

   A. To comply with local clinical agency, state, and federal requirements concerning patient confidentiality and privacy, including HIPAA rules, when communicating to peers, friends, family, or the public via social media outlets.

   B. That the use of personal mobile devices to take photographs of patients or any part of their medical record, with or without patient identifiers, is a violation of patient privacy and agree to not engage in such behavior.

   C. To maintain patient privacy and confidentiality at all times based on ethical and legal obligations.

   D. To not transmit, by way of any electronic media, any patient-related information or image that is reasonably anticipated to violate patient rights to confidentiality or privacy or to otherwise degrade or embarrass the patient.

   E. To not share, post, or otherwise disseminate any information, including images, about a patient or information gained in the nurse-patient relationship with anyone
unless there is a patient care related need to disclose the information or other legal obligation to do so.

F. To not identify patients by name, or post or publish information that may lead to identification of a patient; and that limiting access to postings through privacy settings is not sufficient to ensure privacy.

G. To not refer to patients in a disparaging manner, even if they are not identified.

H. To not take photos or videos of patients on personal devices, including mobile devices.

I. To maintain professional boundaries in the use of electronic media.

J. To consult clinical agency policies or an appropriate leader, charge nurse, assistant nurse manager, or nurse manager, within the organization for guidance regarding clinical agency-related postings governing patient confidentiality and the use of social media.

K. To promptly report any identified breach of confidentiality or privacy to the Nursing Department Chair(s). Student may anonymously report any suspected violation of a classmate or faculty member in order to fulfill the expectation of reporting breaches of confidentiality or privacy.

L. To comply with SCC and clinical agency policies regarding SCC or affiliate-owned computers, cameras, and other electronic devices and use of personal devices in clinical agency sites.

M. To not make disparaging remarks about clinical agency staff, SCC instructors or student colleagues.

N. To not make disparaging remarks regarding fellow students, the nursing program faculty, Spokane Community College, any clinical agency, or any clinical agency staff.

III. **Termination from Nursing Program:** Student understands and agrees that a violation of Section II. A through N is a violation of Community Colleges of Spokane’s Standards of Conduct for Students, WAC 132Q-10-210 (2). It is a breach of a generally recognized standard of practice governing the nursing profession which student is pursuing as an educational goal. These violations are processed under the Standards of Conduct for Students Chapter 132Q-10 WAC and the possible consequences of such a violation, whether intentional or unintentional, include but are not limited to dismissal from the SCC Nursing program.
IV. **Agreement Term:** This Agreement shall remain effective from the date of execution until such time as the student completes the Nursing Program or terminates the program, whichever is earlier.

*Student signature indication receipt and understanding of the student handbook also is inclusive of receipt and understanding of the social media policy.*

### 4.12 Class Representative Role and Responsibilities

**Class Representatives**

**Responsibilities of the Class Representative**

The Class representative will:

1. Attend scheduled 1st nursing faculty meeting of each month, acting as a liaison between the class and the faculty.
2. In the event of illness or other absence by the class representative, the alternate shall assume the duties of class representative.
3. Represent the class regarding issues to the appropriate nursing faculty.
4. Attend Health Science Division meetings as requested by the Department Chair, including the nursing department advisory committee meetings.
5. Schedule and hold class meetings as necessary.
6. Take charge of updating class bulletin boards.
7. Coordinate activities for graduation if desired, e.g., appoint committees, organize fund-raising events.
8. Educate peers on importance of participating in Nursing Program surveys to aid in quality improvement activities.

**Election Procedure:**

1. Nominations are to be held during lecture class early in the first quarter of the nursing program and at the beginning of the fourth quarter of the program, and at any time there is a resignation of a class representative.
2. Nominations will be limited to 4 individuals.
3. Nominees will be allowed a maximum of three minutes during lecture class to give a campaign speech.
4. The election will be conducted by a current class representative and will be secret ballot.
5. The nominee with the most votes shall assume the position of class representative.
6. The nominee with the next highest number of votes will be designated alternate class representative.
7. In the event of a tie, the two candidates receiving the highest number of votes may submit to a second vote, or may co-chair the office.
8. The term of office shall be 3 academic quarters for first year and 3 academic quarters for second year.
9. In the event of a resignation by the class representative, the alternate will assume the representative position and a new alternate will be elected. If no alternate is available a new election will take place.

Procedures for Class-Faculty Communication:

1. The class representative shall be provided with a schedule of nursing class times for the current quarter to enable the scheduling of class meetings.
2. The class representative will negotiate appropriate times with the instructor when announcements must be made to the class.
3. When asked to represent the class or an individual on an issue, the class representative will access the appropriate faculty person using the chain of command outlined in the student handbook.
4. Students will be encouraged to communicate with the appropriate faculty person prior to involving the class representative.

4.13 Clinical Orientation Required Attendance Policy

Orientations within the nursing program require mandatory attendance for nursing students. This includes any and all orientation activities; whether required by the nursing program or by any of the clinical facilities that are utilized by the nursing programs.

The first day of clinical/orientation is mandatory for students. If a student does not attend clinical/orientation or any facility required orientation, the student will not be allowed to attend clinical for the rest of the quarter; resulting in withdrawal from quarter.

4.14 Handbook Disagreement Policy

- Process regarding disagreements with Student Handbook:
  - Communicate concern to Class representative.
  - Class representative will bring disagreement to a faculty meeting.
  - Faculty will discuss disagreement and decide if there will be a change.
  - Faculty will communicate the decision to the student representative to disseminate to the student body.
• Students cannot petition the Student Handbook or sections of the Student Handbook.
• If students do not want to abide by the Student Handbook policies and refuse to sign the Student Handbook signature page, the student will not be able to continue in the Nursing program.

5. GUIDELINES FOR THEORY AND CLINICAL EVALUATION

5.1 Theory Evaluation

Students are evaluated in theory using a variety of methods including written assignments, quizzes, exams, and professional behavior.

The student must achieve a minimum of 78% (GPA 2.0) in theory and PASS the lab/clinical course by meeting 100% of the lab/clinical objectives identified in the course. Percentage points will NOT be rounded up to reach the required 78%.

In order to pass the course, each student must earn the following:

- A minimum of 78% of the combined exam points,
- A minimum of 78% of total weighted within the course, and
- Receive a PASS in pass/fail courses by meeting 100% of the lab/clinical objectives.

HESI RN exit examination

In order to better evaluate student ability to successfully pass NCLEX exam, students in the second year of the program are required to take the HESI RN exit examination. Students are responsible for paying the current cost of the Exit Exam. A score of 850 shows a high probability of passing the NCLEX exam on the first attempt. Failure to achieve this score means that the student will required to complete remediation assignments during quarter 6 in N209 Leadership class.

Students may also purchase the preparation course of his/her choice. Examples of these classes include, but are not limited to: HESI NCLEX preparation, Kaplan NCLEX preparation, Pearson NCLEX review and Hurst Review. The student is responsible for the cost of this course and the completion of this course.

5.2 Clinical Evaluation

Clinical instructors evaluate student progress on an on-going basis in order to document issues and monitor progress. A clinical evaluation tool specific to each course is used to guide this evaluation process. The competencies on the clinical evaluation tools constitute the minimum level of practice that a student must achieve by the completion of the course in order to receive a passing grade. At midterm and the end of each course, a formal written evaluation is completed and is signed by both the instructor and the student. Students are requested to sign
the clinical evaluation tool, which acknowledges receipt of the clinical evaluation but does not imply the student agrees with the evaluation; the student can add comments as well. A student who receives a “needs improvement” mark in any of the competency requirements at mid-term will be counseled by the clinical instructor and an Academic Progress Report will be completed, identifying an improvement plan to assist the student in meeting competency requirements by the end of the quarter (see appendix).

A student who does not meet all of the competencies by the end of the quarter will fail the clinical/lab portion of the course. Students must pass the theory, lab and the clinical portion of each course in order to receive an overall passing grade for the course. At the completion of the quarter, the completed clinical evaluation tool and skills checklists are filed and kept for one year after the student graduates. The student may review his/her file by contacting the Associate Dean of Nursing.

Clinical instructors have the responsibility to remove any student from the clinical area if the student is unable to demonstrate the ability to maintain the safety, comfort, and well-being of a patient. The clinical instructor is ultimately responsible for the actions of the student.

A student may be suspended from the clinical area for any unsafe or unethical practices, including the failure to:

- Adhere to standard precautions
- Properly identify patients
- Assess and report significant changes in the patient’s condition
- Validate with the instructor when nursing actions vary from what has been presented in the classroom or textbook theory
- Recognize and report unsafe environmental conditions
- Correctly administer all medications
- Maintain appropriate medical and/or surgical asepsis
- Recognize own limitations and abilities
- Maintain patient safety
- Maintain the student’s personal clinical file requirements.

In addition, a student may be suspended for any of the following reasons:

The following are some of the violations considered “just cause” for immediate suspension or dismissal:

- Failure to:
  - Adhere to standard precautions.
  - Properly identify patients.
  - Assess and report significant changes in the patient’s condition.
  - Validate with the instructor when nursing actions will vary from what has been presented in the classroom or textbook theory.
  - Recognize and report unsafe environmental conditions.
  - Correctly administer all medications.
- Maintain appropriate medical and/or surgical asepsis.
- Recognize own limitations and abilities.
- Maintain patient safety.
- Failure to maintain the student’s personal clinical file requirements.
- Any dishonesty, cheating or falsifying of documents.
- Any unprofessional or irresponsible behavior.
- Disobedience or insubordination.
- Stealing, willfully destroying or damaging property of patients or others.
- Disorderly conduct that might result in the rescinding of the clinical facility’s contract with the SCC Nursing Program.
- Release of privileged information.
- Duty performance under the influence of drugs, alcohol or other substances.
- Inadequate preparation for participation in the clinical experience.
- Gross negligence in the performance of duty.

Additional criteria are available for review on the clinical evaluation tool associated with each clinical rotation.

Documentation of the above behaviors will be reflected in the clinical evaluation. When any performance occurs that could jeopardize life, impede recovery, or interfere with the maintenance of the patient’s current health status, a conference will be held as soon possible with the student, faculty, and Associate Dean of Nursing. Students may be dismissed from the program for unprofessional behavior as well as academic failure.

**5.3 Clinical Attendance Policy**

Clinical attendance is required and clinical assignments are made either in advance or in real time in compliance with the clinical agency’s needs. **Clinical assignments are not negotiable and are made to be equitable for all students.** Switching assignments is not allowed. Clinical assignments for future quarters will be posted prior to the end of the current quarter that the student is enrolled in. Clinical re-assignment may occur due to the following reasons: student works on the unit they are assigned to, student failed a course with the faculty they are being assigned to, clinical agency has restricted access or assigned clinical day conflicts with military duties, or religious affiliations. If a student is reassigned and declines the reassignment, they will be dropped from the program and will have to return based on the re-admission policy.

A Clinical absence may result in failure of the course due to the inability to complete clinical objectives. If a student misses more than one clinical during the quarter it is very difficult to complete clinical objectives and this may result in a failure of the course. Clinical attendance is vital to ensure that clinical objectives and clinical hours, per the nursing commission, are met.

There is no provision for making up clinical absences. Conferences will be held at midterm, end of the quarter and as needed with each student to discuss his/her progress in achieving clinical objectives. Students are not allowed to attend any clinical or lab sections other than the specific sections that they have been assigned and registered for.
The first day of clinical/orientation is mandatory for all students. If a student does not attend clinical/orientation, the student will not be allowed to attend clinical for the rest of the quarter; resulting in withdrawal from the quarter.

5.4 Quarterly Skills Return Demonstration

As part of the clinical requirement, students must demonstrate competency in performing identified skills each quarter. Students must attend the assigned nursing skill lab. There is no provision for making up the missed hours in skills lab. Students may attend another skills lab (with the permission of the instructor and dependent on available space) to obtain the content, however, such attendance will not be considered a make-up for missing the assigned lab. Students may also be required to attend assigned practice sessions in the lab. Students should refer to course syllabi for additional skills lab requirements each quarter. Quarterly Skills Return Demonstration forms will be available through the web-based communication platform (CANVAS), and these forms must be completed and turned in to the clinical instructor on the assigned date.

Certain lab skills may require practicing a particular skill on another student (IM injections, finger sticks, etc.). Students have the option to conduct these skills on each other in a supervised setting. In order to practice these skills, an invasive procedures form must be completed (see appendix).

5.5 Laboratory Skills Requirements

Laboratory Instructors: Students are required to show competency in the laboratory setting before attempting any of the skills in the clinical setting. During laboratory time, the student will practice the skill until he/she feels ready to demonstrate the skill in front of the instructor. The student must demonstrate appropriate/safe completion of the skill before being checked off by the lab instructor. If the student requires prompting or is unsuccessful in demonstrating the skill, he/she will continue practicing. When ready, the student will have a second chance to demonstrate the skill. If the skill cannot be demonstrated successfully on the second try, the student will be required to attend open lab for continued practice.

Student: All skills must be competently demonstrated in the laboratory setting before being attempted in the clinical setting. It is your responsibility to show your clinical instructor the check-off sheet to verify that you have done the skill in lab. All skills must be signed off by the end of the quarter to successfully pass the clinical portion of the course. You will not always have the opportunity to demonstrate all the skills in the clinical setting; however, at a minimum, they need to all be signed off in lab. If possible, attempt to have them all signed off in clinical as well.

Clinical Instructors: Students are not allowed to attempt skills in the clinical setting until you have verified that they have been checked off on the skill in the laboratory setting. By signing
above, you are verifying that the student showed competency with the skill and did not require your assistance or cueing. If they did not perform the skill adequately, do not sign off. It is the student’s responsibility to keep track of this form. All skills need to be signed off by the clinical instructor, not by a facility nurse. Please return this form to the course coordinator so it can be filed in the student’s clinical file at the end of the quarter with their evaluation.

**Students:** Attendance is required for all clinical/lab rotation days. In the event of an emergency or illness, one clinical/lab absence during a quarter may be excused, subject to review by the Course Coordinator and the Associate Dean of Nursing. All skills must be competently demonstrated in the laboratory setting before being attempted in the clinical setting. It is your responsibility to show your clinical instructor the check-off sheet to verify that you have done the skill in lab. All skills must be signed off by the end of the quarter to successfully pass the clinical portion of the course. You will not always have the opportunity to demonstrate all the skills in the clinical setting; however, at a minimum, they need to all be signed off in lab. If possible, attempt to have them all signed off in clinical as well.

### 5.6 Laboratory Evaluation

Students will take a quiz at the beginning of each laboratory session in order to ensure that they have done the preparatory readings/videos. Students must maintain an average of 78% on all quizzes in order to successfully pass the laboratory portion of the course. If a student does not maintain a 78% average on the quizzes, he or she will fail the lab course and be required to repeat the laboratory/clinical course as well as the associated theory course.

Students must demonstrate competency in the performance of identified skills each quarter as part of the clinical requirement. Skills lab is considered part of the clinical experience. Students will be required to be in SCC approved uniform and will be asked to leave the lab if not in uniform (no coffee, food or drinks will be allowed in lab) Absence from skills lab will be considered a clinical absence. Students must attend their assigned nursing skill lab. There is no provision for making up skills lab. Students may attend another skills lab with the permission of the instructor and if space is available to obtain the content, but it will not be considered a make-up for missing their assigned lab. Students may also be required to attend assigned practice sessions in the lab. Students should refer to course syllabi for details on the skills lab requirements for each quarter. See Canvas for quarterly skills check-off forms. Skills Check-Off forms must be completed and turned in to the clinical instructor on the assigned date.

- It is expected that you are prepared for lab by having completed the assigned reading/prior to lab class. Individual lab instructors will discuss how you will be evaluated. Your success in lab is also measured by your participation in lab and your demonstrated competencies on the skills.
• Competency will be measured by your return demonstration of the assigned skill. During lab you will receive ongoing feedback concerning your competency in skills with the chance to remediate certain skills if necessary.
• Failure to successfully demonstrate clinical skills within 2 attempts in the laboratory setting will result in a course failure. Due to patient safety this will result in immediate removal from the clinical setting.

Laboratory instructors evaluate student progress on an on-going basis in order to document issues and monitor progress. A laboratory skills evaluation tool specific to each course is used to guide this evaluation process. The competencies on the laboratory evaluation tools constitute the minimum level of practice that a student must achieve by the completion of the course in order to receive a passing grade. At midterm and the end of each course, a formal written evaluation is completed and is signed by both the instructor and the student. Students are requested to sign the laboratory evaluation tool, which acknowledges receipt of the laboratory evaluation but does not imply the student agrees with the evaluation; the student can add comments as well. A student who receives a “needs improvement” mark in any of the competency requirements at mid-term will be counseled by the laboratory instructor and an Academic Progress Report will be completed, identifying an improvement plan to assist the student in meeting competency requirements by the end of the quarter (see appendix).

A student who does not meet all of the competencies by the end of the quarter will fail the clinical/laboratory portion of the course. Students must pass the theory, laboratory and clinical portion of each course in order to receive an overall passing grade for the course. At the completion of the quarter, the completed laboratory evaluation tool and skills checklists are filed and kept for one year after the student graduates. The student may review his/her file by contacting the Associate Dean of Nursing.

5.7 Laboratory Attendance Policy
All skills must be completed satisfactorily and checked off by an instructor for the student to pass lab. If a student misses lab, it is their responsibility to go to open lab, practice the skill(s) that were covered in class and have the skill(s) checked off by their lab instructor. Skills may also be checked off by the open lab instructor with the approval of the main instructor. The skill(s) must be checked off before the next lab class and more than one (1) lab absence may result in a failure of the class.

5.8 Incident Reports (Clinical Area)
When the student and clinical instructor complete an incident report, it is routed to the Associate Dean of Nursing, who reviews and places the form in the student file. It will remain in the student's file until graduation. In addition, the instructor will fill out the facility's incident report and the student will receive appropriate follow-up instruction.

5.9 Blood-borne Pathogen Exposure Guide
When a blood-borne pathogen exposure occurs, the following procedure is recommended:
• Notify the clinical instructor immediately
• Follow standard precautions for exposure (the latest CDC guidelines):
  o Wash needle sticks and cuts with soap and water
  o Flush splashes to the nose, mouth, or skin with water
  o Irrigate eyes with clean water, saline, or sterile solution

Students must report the incident to the charge nurse. An incident report may need to be completed. Most facilities will follow the protocol for management of occupational exposure to blood-borne pathogens. Students need to ask the clinical instructor about this, and source testing should be discussed. If the student needs emergency care, the student is responsible for payment of that care. Many facilities require their employees to go to the Emergency Department.

Students must complete the SCC Incident/Accident Report and the Incident Report (Clinical Area) form (see appendix).

5.10 Pregnancy

It is the student's responsibility to notify the Associate Dean of Nursing and the course faculty of a pregnancy. During the pregnancy, students must be under the care of a Primary Care Provider who supplies a “release note” each quarter allowing the student to attend clinical, laboratory learning, and – after delivery – to fully participate in the clinical setting (full participation includes, but is not limited to, long periods of standing, heavy lifting and long hours). Clinical agencies may also require their own copies of a Primary Care Provider release to participate in clinical settings.

Pregnant students are encouraged to use every precaution to avoid exposure to radiation and any other defined medical teratogens in school/clinical settings by informing the facilities of the pregnancy.

5.11 Injuries and Surgeries

Students who sustain an injury or undergo a surgical procedure during the program are required to provide a “release note” from their Primary Care Provider stating that they are allowed to return and fully participate in laboratory/clinical learning.

5.12 Electronic Devices

Due to the distraction caused by items such as cellular phones, pagers, PDAs, and other audible electronic devices in the classroom, students are required to turn these devices off during class time. The faculty member teaching must approve recording of any lecture or class in advance, and the faculty member has the right to decline the request. Students requiring recording for ADA needs must provide the request in writing from the ADA counselor in advance.
5.13 Scope of Practice Decision Tree

1. Describe the act to be performed.
   
   Review the scope of practice for your licensure level:

   **RN**

   Assessment, nursing diagnosis, setting goals, planning care strategies, implementing care, delegating care to qualified others, supervising, evaluating, teaching, managing care, maintaining client safety, collaborating with other healthcare members.

   **LPN**

   Contributing to assessment, participating in development of plan of care, implementing aspects of care as directed, maintaining client safety, participating in evaluating care, and delegating care to qualified others.

   **ARNP**

   Assessing clients, synthesizing and analyzing data, understanding and applying nursing principals at an advanced level; providing expert teaching and guidance; working effectively with clients, families and other members of the healthcare team; managing clients’ physical and psycho-social health-illness status; utilizing research skills; analyzing multiple sources of data, identifying alternative possibilities as to the nature of a health care problem, and selecting appropriate treatment; making independent decisions in solving complex client care problems; performing acts of diagnosing, prescribing, administering and dispensing therapeutic measures; and recognizing limits of knowledge and experience, planning for situations beyond expertise, consulting with or referring to other healthcare providers as appropriate.
1. Is the act expressly permitted or prohibited by the Nurse Practice Act for the license you hold?

- UNSURE
  - Go to #2
- WITHIN SCOPE FOR YOUR LICENSE
  - Go to #3
- PROHIBITED
  - STOP

2. Is the act consistent with at least one of the following standards?

- Nursing Care Quality Assurance Commission (NCQAC) standards of practice
- National nursing organization standards of practice
- Nursing literature and research
- Reasonable, prudent nurse in similar circumstances

- Yes
  - Go to #3
- NO
  - STOP
  - Not within the SCOPE Of Practice
3. Do you personally possess the depth and breadth of knowledge to perform the act safely and effectively, as acquired in a pre-licensure program, post-basic program, continuing education program or structured self-study?

Yes

NO

STOP

Go to # 4

Gained

Until Additional Knowledge

4. Do you personally possess current clinical skills to perform the act safely?

Yes

NO

STOP

Go to # 5

Until Clinical Skills Are Attained
5. Is the performance of the act within the accepted "standard of care" which would be provided in similar circumstances by reasonable and prudent nurses who have similar training and experience and consistent with appropriately established facility/agency policies and procedures?

- Yes
- NO

**STOP**

Go to # 6

Performance of Act
May Place both Patient/Client and Nurse at Risk

6. Are you prepared to accept the consequences of your action?

- Yes
- NO

**STOP**

PERFORM THE ACT*

Is not Assumed!

6. REQUIRED DOCUMENTATION

6.1 Clinical Passport

In order to attend clinical, students must have written documentation of their completion of all clinical requirements on uploaded on American Data Bank/Complio. Students who do not have all current clinical requirements before the start of each quarter are subject to suspension/dismissal. It is the student’s responsibility to monitor status and keep in compliance with clinical requirements.

Seasonal Flu Vaccine: Obtain on or before October 15 each fall quarter

CPNW Clinical Passport Document:

The CPNW Clinical Passport Document is a two-sided form with detailed definitions and timelines for immunizations, titers, and other requirements for clinical placement. Students are to study both sides of
the CPNW passport to help collect proper documents from their health care provider or clinic. A hard copy of the passport is for students to use for their own records. (see appendix for example)

Students upload complete passport-required documents into American Data Bank (complio). If documents are not legible or do not meet requirements for accuracy, the clinical placement coordinator will mark the upload as “not accepted” and the student will be required to re-submit the correct forms.

Proof of immunizations and titers must show the five items below on the verification document:

1. Student’s name
2. Identification of clinic or pharmacy
3. Electronic or handwritten signature of provider/pharmacist
4. Vaccination administered, date
5. Titer tested, date - results clearly identified

**Student Responsibilities for Complio and CPNW**

**Complio**: After initial set-up, students are responsible to monitor their American Data Bank – Complio account routinely. **Fulfill expiring sections before expiration dates.** (Sign reviewed signature handbook page AFTER the expiration date.)

**CPNW**: After initial set-up, students are responsible to monitor their CPNW account. E-learning modules are valid for one year. **Watch for expiring learning modules.** Upload a pdf copy of all passed modules into American Data Bank – Complio.

**6.2 Criminal Background Check**

Federal Law, Washington State law (R.C.W. 43.43.830 through 43.43.840) mandates that criminal background checks be conducted on all students entering clinical agencies. This law also stipulates that any student nurse with a criminal history of “crimes against persons” is not allowed to work in a nursing home. “Crimes against persons” include conviction for offenses such as theft, murder, kidnapping, assault, rape, robbery, arson, burglary, manslaughter, extortion, incest, indecent liberties, vehicular homicide, prostitution, or criminal mistreatment.

Federal law and SCC policy requires that each student complete a Criminal History Disclosure form. This document is included in the documents within the Complio (AKA American Data Bank) electronic records program. Students must upload both pages of the document and provided printed name, signature, and date as indicated on the form.

The clinical and capstone rotations are held in both acute care and nursing homes agencies; these clinical experiences are an integral part of the nursing curriculum. Students with a criminal history of “crimes against persons” may not be able to attend clinical, which could affect their progress in the Nursing Program. Some agencies may require copies of student background checks to be on file at the clinical site; copies will be sent to these agencies upon request with the written consent of the student.
The CHILD AND ADULT ABUSE INFORMATION LAW of January 1, 1988, requires the organizations that care for children or developmentally disabled persons must have prospective caregivers disclose whether the applicant has been convicted of certain “crimes against persons.” This disclosure must be made in writing and signed by the student.

All students must complete the necessary Background Authorization forms upon admission to the Nursing Program and prior to starting the 4th quarter. Any student returning to the program will also need to complete the form. The student is responsible for any cost associated with background checks. Students are responsible for the cost of all background checks.

6.3 Drug Screening

Spokane Community College does not require drug testing of students for admission to the college or to any program of the college. However, some clinical agencies used by the college’s Nursing Program require drug testing of students for clinical practicum placement. If a student is assigned to a clinical practicum site that requires drug testing, the student will be required by that practicum site to submit to drug testing. The student is responsible for paying for the test. If the student is not accepted by a clinical site for drug-related reasons, the student will be dismissed from the nursing program.

A non-qualify drug screen is a drug screen that has positive results without a doctor’s note. Prescriptions for THC compounds are not allowed. Positive drug screen that is non-qualifying will result in a withdrawal from the program. If this is the student’s first attempt then the student will be able to put their name on the waiting list to return to the program. If this is the student’s seconded attempt then this will result in a final dismissal from the program.

The college is committed to maintaining an environment of teaching and learning that is free of illicit drugs and alcohol. Any student who—while in any college facility or participating in a college-related program—uses, possesses, consumes, is demonstrably under the influence of, or sells any narcotic drug or controlled substance as defined in RCW 69.50.101, in violation of law or in a manner which significantly disrupts a college activity, shall be subject to discipline. A separate student brochure with drug and alcohol information is available through Human Resources.

All nursing students must understand that despite Washington State’s recreational and medical marijuana laws, marijuana remains a controlled substance under federal law. Drug screening conducted by clinical sites will test for evidence of use of several controlled substances including marijuana and cannabis products. Persons failing clinical site drug screening tests will not only subject themselves to the Office of Student Standards disciplinary process, they will also disqualify themselves from training at the clinical site, which conducted the test. Moreover, positive drug testing results may result in the inability to receive a state-issued license to practice nursing even if the student is not dismissed from the Nursing program and/or the college for use of a controlled substance. If students are not able to complete their clinical practice experiences, they may not be able to graduate and therefore would not be eligible for licensure.
7. CURRICULUM

7.1. Course Schedule

The scheduled curriculum for the Nursing Program is as follows:

<table>
<thead>
<tr>
<th>QTR</th>
<th>Course Name</th>

### Textbook Policy

The SCC Nursing utilizes the two-year CoursePoint program offered by Wolters-Kluwer. Per the publisher, it is a 6 quarter package and students are required to pay for the entire package. However, students have the option of either paying in full at the beginning of year one, or splitting the program cost and making two payments (the second payment being due at the beginning of the 5th quarter). SCC nursing courses require that students have access to CoursePoint for the entirety of the nursing program. This package must be purchased from the SCC bookstore for consistency in content and cost.
Welcome Spokane Nursing Students!

Below is information about your Nursing Concepts Library. This bundle is available for you exclusively at your campus bookstore at:

7.3 Grading Policy

In order to pass a course, students must complete all the following:

- earn an average of 78% (GPA 2.0) on all quizzes and/or examinations
- earn an average of 78% (GPA 2.0) on all lab quizzes
- earn an average of 78% of the total possible points within the course
- meet 100% of the clinical objectives (if the course has a clinical component)

Percentage points will NOT be rounded.

Students must achieve a 78% average on tests and quizzes in order to accumulate points for any additional assignments. If a student fails to achieve a 78% average on tests and quizzes, the student’s final course grade will be recorded as the student’s test/quiz percentage(<2.0)

If the student fails the theory course, the student will earn a grade for the course in one of the following ways. If students fail to earn 78% on the exams, they will be assigned the grade percentage calculated by totaling the student's individual points attained on the exams divided by the total exam points possible. If students fail because they do not have enough total points to pass the course (even if they passed their exams), they receive the grade they earned based on the weighted grading system.

If clinical/lab is failed, the student will earn a FAIL. The student must meet all points of evaluation as noted in the syllabus in order to PASS a PASS/FAIL course. Students that receive a FAIL in clinical/lab must retake all components of the course (theory and clinical/lab).

When retaking a failed nursing course, all components (theory and clinical/lab) must be repeated.

It is the student’s responsibility to keep track of his or her clinical/lab performance and theory grades on the SCC web-based learning system (CANVAS). If a student’s score is less than 2.0 or 78% in a nursing course at midterm, or receives at least one NI (needs improvement) in a clinical/lab course, the faculty member will notify the student of the failing grade. The faculty member will attempt to arrange a meeting to address the student’s needs for academic success and provide them with a Student Academic Progress Report (see appendix). The student is responsible for adhering to the plan of action outlined in the Student Academic Progress Report.

7.4 Grading Scale

Grades are converted to the 4.0 scale from percentages based on the following chart:

<table>
<thead>
<tr>
<th>Grading Scale</th>
<th>G.P.A.</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Superior Achievement</td>
<td>“A”</td>
<td>97-100</td>
</tr>
<tr>
<td></td>
<td>4.0</td>
<td>96</td>
</tr>
<tr>
<td></td>
<td>3.9</td>
<td>95</td>
</tr>
<tr>
<td></td>
<td>3.8</td>
<td></td>
</tr>
</tbody>
</table>
### 7.5 Paper Organization

APA format is required for all formal papers and reference citations in the Nursing Program. For information on APA formatting, see [http://owl.english.purdue.edu/owl/resource/560/01/](http://owl.english.purdue.edu/owl/resource/560/01/) APA uses “clearly readable” fonts including Times New Roman, Courier New, and Arial – all 12-point fonts. Font choices must be consistent throughout the paper.

When submitting documents online, files must be compatible with Microsoft Word.

### 7.6 Pinning

A pinning ceremony may be held at the completion of the sixth quarter. The students, under the direction of the Student Activities, organize this ceremony. This ceremony is a non-academic celebration that honors the spirit of nursing. Being non-academic, students and faculty attire is business attire.

### 7.6 Graduation

It is the student’s responsibility to be sure that all courses required for their certificate/degree are satisfactorily completed. Counselors are available if there are questions about the student’s status in the program. Each student is required to submit a Petition for Graduation to the Admissions Office at least one quarter before graduating. This required for the Associated Degree of Nursing (ADN).
In celebration of the academic success, upon completion of the nursing program, the college has one graduation ceremony at the end of the Spring Quarter. All students are encouraged to participate in the ceremony. Students that participate in the college graduation ceremony wear caps, gowns and any academic honor regalia such as honor cords.

7.7 Guidelines for Addressing Student Concerns

It is the belief and practice at SCC that the best way for students to solve problems is to first meet with the instructor or staff member involved and attempt to resolve the problem. This often resolves the issue quickly and effectively.

The following steps are to be followed by the student when seeking review of an informal concern involving a faculty member of Community Colleges of Spokane. The student is asked to remember:

1. This is an informal process, requiring no paperwork or forms. The intent is to establish a dialogue between the student and the faculty member that results in resolution of the concern.
2. Concern(s) must be initiated within 10 instructional days of the start of the quarter following the quarter during which the alleged action(s) occurred. An informal concern may be initiated in summer quarter if the faculty member and student mutually agree.
3. The review of concern(s) must proceed from the lowest level of review to higher levels of review.
4. The student will make reasonable effort to complete the informal concern process within 20 instructional days. The student has a right, with advance notice, to a supporter* during any meeting.
5. At any point during the informal process, the department chair and/or dean may call an informal meeting between the student and faculty to attempt resolution.
6. Group concerns will not be considered.

Step 1: The student communicates with the faculty member with whom they have the concern and describes the concern. The faculty member has 5 instructional days to respond after hearing the student’s informal concern. There is no need for further action if the concern is resolved at Step 1.

Step 2: If the informal concern is not resolved at Step 1, the student next speaks with the faculty member’s department chair. The department chair will first ascertain if the student made attempts to contact the faculty member for step one resolution. If so, then the chair will attempt to facilitate an acceptable resolution between faculty member and student. The chair will have 5 instructional days to respond after hearing the student’s informal concern. There is no need for further action if the concern is resolved at Step 2.
Step 3: If the informal concern is not resolved at Step 2 and or is determined by the faculty member’s dean to be appropriately advanced to this step** the student next speaks with the dean. Upon the dean determining that appropriate steps were followed, the dean will attempt to informally resolve the concern. The dean will respond to the student within 10 instructional days of receiving the concern; the dean will inform the faculty member and department chair of the response. If the concern cannot be resolved at this informal level and the issue warrants formal action, the student may proceed to the Formal Process for Addressing Student Complaints.

Special Circumstances: If at any point during the concern process it’s determined the concern may involve violation of federal/state law or Board policy, the concern may be forwarded to the appropriate office.

Formal Student Complaint Process: If a student concern has not been resolved to the student’s satisfaction following the informal resolution process, the student may file a formal complaint utilizing the form, in the appendix of this document. The form must be submitted to the dean’s office within ten (10) instructional days of the dean’s Step Three response. Failure to do so causes the complaint to be denied as untimely. A copy of the Formal Complaint Form is available in appendix.

*Supporter is a non-employee who provides support to the complaining student but otherwise does not speak or provide legal counsel on the student’s behalf
**The student may initiate the informal concern directly at Step 3 provided the cause for the student not proceeding through Step 1 and Step 2 is ascertained and found credible by the dean.

8. MISCELLANEOUS INFORMATION

8.1 Counseling

Educational, vocational and personal counseling services are available to all students through various SCC satellite counseling sites. If personal or school-related problems arise that a student and his or her continuation and/or performance in the program, the following assistance is available:

- Clinical or theory instructors
- Health Science Counselors
- Nursing Department Chair
- Associate Dean of Nursing
8.2 Career Services/Job Placement

The Student Success and Career Services office is located in the Student Center (Lair, Building 6). It is available to all students and alumni to assist in locating employment opportunities, developing resumes/cover letters, strengthening interview techniques, and performing other job-search skills. In addition to the student services listed in the Appendix, SCC offers an employment database known as “Bigfoot Jobs”; it allows students to activate their own profiles, post resumes, search for employer-posted jobs, etc. Job opportunities listed in “Bigfoot Jobs” for Health Science students/graduates are posted in various areas of the Health Science Building and on the nursing program website.

8.3 Student Nursing Employment Opportunities

Timeline Eligibility for Nursing Certifications and Licenses

- Nursing Assistant Certified (NAC): Student is eligible to become certified after completion of the first quarter.
- Nurse Technician: Student is eligible to become registered after completion of the second quarter.
- Licensed Practical Nurse: Student is eligible to become licensed after completion of the fourth quarter and completion of a Personal and Vocational Relationship class (an online course is offered at WSU).
- Registered Nurse: Student is eligible to become licensed after completion of the sixth quarter.

These Certifications/Licenses are optional and students must complete an application to become certified or licensed. These applications can be found on the Nursing Care Quality Assurance Commission Washington State website:

http://www.doh.wa.gov/LicensesPermitsandCertificates/NursingCommission

Nursing Technician: Definition

a. Definition: WAC 246-840-840

i. The purpose of the nursing technician credential is to provide additional work-related opportunities for students enrolled in an ADN or BSN program, within the limits of their education, to gain valuable judgment and knowledge through expanded work opportunities.

ii. The nursing technician is as defined in WAC 246-840-010(19):

“Nursing technician” means a nursing student preparing for registered nurse licensure who is employed in a hospital licensed under chapter 70.41 RCW or a nursing home licensed under chapter 18.51 RCW, and who
iii. Is currently enrolled in good standing and attending a Nursing Program approved by the commission and has not graduated; or

iv. Is a graduate of a Nursing Program approved by the commission who graduated within the past thirty days; or within the past sixty days and has received a determination that there is good cause to continue the registration period.

v. Approved schools for nursing technicians include the list of registered nursing programs (schools) approved by state boards of nursing as preparation for the NCLEX-RN® examination and listed in the NCLEX bulletin as meeting minimum standards. Approved schools do not include nontraditional schools as defined in subsection (16) of this section.

vi. The nursing technician shall have knowledge and understanding of the laws and rules regulating the nursing technician and shall function within the legal scope of their authorization under chapter 18.79 RCW and shall be responsible and accountable for the specific nursing functions which they can safely perform as verified by their nursing program.

vii. The nursing technician shall work directly for the hospital or nursing home and may not be employed in these facilities through a temporary agency.

a. **Functions: RCW 18.79.350**
   Nursing technicians are authorized to perform specific nursing functions within the limits of their education, up to their skill and knowledge, but they may not:

   i. Administer chemotherapy, blood or blood products, intravenous medications, or scheduled drugs, or carry out procedures on central lines;

   ii. Assume ongoing responsibility for assessments, planning, implementation, or evaluation of the care of patients;

   iii. Function independently, act as a supervisor, or delegate tasks to licensed practical nurses, nursing assistants, or unlicensed personnel; or

   iv. Perform or attempt to perform nursing techniques or procedures for which the nursing technician lacks the appropriate knowledge, experience, and education;

   v. Nursing technicians may function only under the direct supervision of a registered nurse who agrees to act as supervisor and is immediately available to the nursing technician. The supervising registered nurse must have an unrestricted license with at least two years of clinical practice in the setting where the nursing technician works;

   vi. Nursing technicians may only perform specific nursing functions based upon and limited to their education and when they have demonstrated the ability and been verified to safely perform these functions by the nursing program in which
the nurse technician is enrolled. The nursing program providing verification is immune from liability for any nursing function performed or not performed by the nursing technician;

vii. Nursing technicians are responsible and accountable for their specific nursing functions.

8.4 Learning Resources

No food or beverages are allowed in the computer labs or the learning resource locations, including nursing labs and nursing simulation labs.

Students will find that basic computer skills, such as accessing online information for courses or the college, are necessary for all students enrolled in the nursing program. Students will need a computer or access to a computer on a regular basis. This includes 2007 or newer Microsoft Office Word and high-speed Internet. If students are enrolled in an online course, they may need to use various tools, such as discussion boards, email or web-based videos for the course. All students need access to the college’s web-based management system (CANVAS) for all courses.

A computer lab is available to all students. It is equipped with internet access and limited printing capabilities. The computer lab is located in the Health Science Building, Room 008. Other computer labs are available throughout campus for student use.

Areas for individual and group study are available in the Learning Resource Center (Building 6).

The Nursing Lab in Room 146 in the Health Science building and Room 145 in the Jenkins Wellness building are skills practice and simulation areas. Check schedules quarterly. Hours are posted outside the lab door and on the college’s current learning management system.

Tutoring is available every quarter through the counseling department. Tutors are vetted senior nursing students with a 3.5 GPA or higher who have applied to be a paid tutor. Tutors are trained and monitored by the counseling department. They are there to assist fellow nursing students be successful. Students can be referred by faculty or self-refer to use the tutoring services.

8.5 Holidays/School Closures

All classes and clinical rotations will follow the college calendar, with the exception of Summer Quarter, which runs 8 weeks. In the event of a school closure related to inclement weather or other CCS-sanctioned closures, there will be no nursing classes, clinical, or labs, including capstone clinical assignments. Students are advised to sign up for the CCS alerts and to check CCS website and operations hotline.

8.6 Financial Aid
The Financial Aid program includes work scholarships, educational opportunity grants, and part-time employment. Application forms for financial aid and part-time employment are available in the Financial Aid Office in the Student Services Building (Building 15). See the Financial Aid Office to answer any additional questions.

8.7 Visitors and Children

Visitors, including children, cannot be in the classroom without prior approval from instructor. A request must be sent and approved prior to start of the quarter. Children cannot be left unattended or unsupervised by parents/or guardians at any time.

8.8 Vocational Clubs/Campus Activities

Students are encouraged to participate in campus activities, including the student government, campus activities, student organizations, the Nursing Club, the National Student Nurses Association (NSNA), and other social activities. Check the SCC website for additional student clubs.

8.9 Nursing Club

Active membership in the Nursing Club is open to members of the SCC student body who are currently enrolled in the SCC Nursing Program. The club's purpose is to promote an interest in the field of nursing, to foster a sense of service within club members, to promote health awareness, and to allow club members to play a proactive role in their community. Members participate in fundraising activities and receive funds from the SCC Associated Student Government for club activities such as travel to conventions and regional workshops. Members sponsor educational guest speakers, community projects and events, and they attend meetings of the SCC Associated Student Government and participate in school-sponsored activities. Officers are elected for the club and include the President, Vice-President, Secretary and Treasurer. The club advisor is a nursing faculty member.

8.10 Student Services

SCC's student center, the Lair, is the center of student activities and services. The college store and the cafeteria are located in the Lair.

The Student Health Clinic is located in the Jenkins Wellness Center (Building 7). It is open to all currently registered SCC and SFCC students. There are regularly scheduled hours during Fall, Winter, and Spring Quarters, with limited hours during Summer Quarter. Students may schedule appointments to be seen or may walk in for services.

8.11 Telephones

A non-pay phone is available in the Health Science Building for short, local calls. In the clinical
area, the instructor will identify the location of phones that may be used.

Students must inform family members and/or employers not to call the college or the clinical facility except in an emergency.

8.12 LRC – Learning Resource Center

SCC has an extensive library with a variety of multimedia resources for Health Sciences students located in building 16. Instructions on accessing the approved nursing resources are posted on the college’s learning management system each quarter.

8.13 Smoking, Eating, and Drinking

Smoking, including electronic cigarettes, is not allowed in the Health Science Building or within 25 feet of any state building. Non-alcoholic beverages and food are allowed only with permission of the instructor.

WAC 132-Q-10231
Use of tobacco, electronic cigarettes, and related products.

Use of tobacco, electronic cigarettes, and related products are prohibited in all Community Colleges of Spokane facilities and motor pool vehicles with no exception.

(1) Smoking and tobacco use are also prohibited:
   (a) Within twenty five feet of entrances, exits, windows that open, and ventilation intakes that serve an enclosed area where smoking and tobacco use are prohibited; and
   (b) Where designated on college premises.

(2) "Smoking" means:
   (a) Inhaling, exhaling, burning, carrying or possessing any lighted tobacco product, including cigarettes, cigars, bidi, clove cigarettes, pipe tobacco, and any other lit tobacco products; or
   (b) Use of electronic nicotine delivery devices and related products including, but not limited to, electronic cigarettes, vapor cigarettes, hookahs, water-pipes or similar products.

(3) "Tobacco use" means the personal use of:
   (a) Any tobacco product, which shall include smoking, as defined in subsection (2) of this section, as well as use of an electronic cigarette or any other device intended to simulate smoking;
   (b) Smokeless tobacco, including snuff, chewing tobacco, smokeless pouches, or any other form of loose-leaf, smokeless tobacco.
(4) "Facilities" means a district owned or controlled property, building, or component of that property/building.

(5) "Motor pool vehicles" means vehicles assigned to specific college departments or programs; vehicles used for instructional purposes; vehicles dispatched to staff and students on a reserved, single-use basis; and vehicles assigned to specific faculty and staff.

[Statutory Authority: RCW 28B.50.140. WSR 1515161,§ 132Q10231, filed 7/21/15, effective 8/21/15.]

8.14 Licensing Exams Option (NCLEX-PN® and NCLEX-RN®)

Students, who successfully complete the first four quarters of the Nursing Program, successfully complete the Washington State University (WSU) Personal and Vocational Relationship course, and are deemed safe to work as an LPN are eligible to take the NCLEX-PN® examination. WSU offers the Personal and Vocational Relationship course online. Successful completion of this course is required in order to be eligible for the NCLEX-PN. This is a 15 hour self-directed course. If interested you may contact Washington State University at the Professional Development Office.

Students who want to take the LPN test must do the following: 1) complete the LPN application on the DOH website; 2) contact the SCC registrar’s office to arrange forwarding of official transcripts to the testing body; and 3) contact the Associate Dean of Nursing via email to request a written statement to be forwarded to the DOH. This statement will confirm that the student is safe to practice as an LPN. If the student has a history of unsafe practice during the Nursing Program, further evaluation will be required before statement is submitted. Further application information is available at https://www.ncsbn.org/nclex-application-and-registration.htm.

Students who successfully complete both years (six quarters) are eligible to write the NCLEX-RN® examination. Applications for the exams are available on the Department of Health website. It is the student’s responsibility to complete the forms and pay the exam fees. The Associate Dean of Nursing will electronically submit a certificate of completion to the Department of Health.
9. APPENDIX

Clinical Placements Northwest
Student/Faculty
Clinical Passport Requirements

<table>
<thead>
<tr>
<th>Student/Faculty Name: last, First, M.J.</th>
</tr>
</thead>
<tbody>
<tr>
<td>College:</td>
</tr>
<tr>
<td>Program:</td>
</tr>
</tbody>
</table>

These requirements are in place for the health and safety of students, faculty and their patients.

By contract with your academic institution, all students and faculty participating in learning experiences at this healthcare site must meet the following health and safety requirements. The academic institution is responsible for ensuring that requirements have been met prior to participation in patient care/clinical experience. Records will be kept at the academic institution and random review by the clinical affiliates will occur on a regular basis. Documentation must meet requirements of all states. Required immunizations must include mmr/ots/vp/vpp if available.

### Submitted Once

- Tuberculin Status
  - Documentation of an initial 2-step TST is required AND documentation of an initial 2-step was completed.
  - If no record of previous positive TB tests or more than 12 months since last TST then 2-step TST OR
  - Negative TB IGRA test within 12 months OR
  - If negative TST within 12 months then 1-step TST OR
  - If newly positive TST or TB IGRA -> F/U with healthcare provider (chest x-ray, symptoms check and possible treatment documentation of absence of active TB disease) and need to complete health questionnaire.
  - If history of positive TST -> provide documentation of TST reading, provide proof of chest x-ray documenting absence of M. TB, medical treatment and negative symptom check.
  - If history of BCG vaccine -> TST skin testing as above or TB IGRA. If negative it OK; if positive follow-up as above.

- Hepatitis B
  - Documentation of series of 3 vaccines completed at appropriate time intervals and post vaccination titer at 6-9 weeks after series completion. If negative titer, then repeat series (consisting of doses 4-6E) and repeat titer 6-9 weeks after 6E dose. OR obtain challenge dose 4 and re-titer after 6-8 weeks OR
  - Provide documentation of positive titer (anti-HBs or Hep B Ser) OR
  - Signed declination for students/faculty who decline vaccination.

- Variella
  - Proof of vaccination [2 doses at appropriate intervals] OR
  - Proof of negative antibody titer.

- Tetanus, Diphtheria, Pertussis (Tdap)
  - Tdap required once “Tdap dose received after age 11 years”
  - Td required every 10 years after Tdap.

- CPR
  - American Heart Association [AHA] BLS Provider Card or Military Training Network (MTN) Provider Card only.

### Submitted Every Year

- Tuberculin Status
  - Annual TST OR
  - Annual TB IGRA test OR
  - If newly positive TST/IGRA results -> F/U with healthcare provider (chest x-ray, symptoms check and possible treatment documentation of absence of active TB disease) and need to complete health questionnaire.
  - Previously documented positive TST results and prior negative chest x-ray results. Complete Annual Symptom Check Form. If any “yes” responses -> F/U with healthcare provider.

- Influenza
  - Proof of seasonal vaccination(s) OR
  - Signed declination for students/faculty who decline vaccination.

- Background Checks
  - National Criminal Background Check and Washington State Patrol Background Check (WATCh) upon admission/re-admission and re-entry/retro program to include all counties of residence in all Washington state counties per RCW 43.43.330 and DIS and ISA screens. Excluded Provider search on:
    - OSU http://exclusions.ohioh.edu/ (conducted bi-monthly by CPNW)
    - ISA http://www.wamc.gov/ (conducted bi-monthly by CPNW)

  - Washington State Patrol Background Check (WATCh annually thereafter)

- Disclosure Statement (annual) and kept on file by health institution

- License (if applicable)
  - Current
  - Unencumbered

- Insurance
  - Professional Liability $1,000,000/3,000,000,000 policy [This may be coverage via the school or individuals].

- Additional Requirements (if applicable)
  - Some healthcare settings may have additional requirements, such as the following:
    - Vehicle Insurance [pre access to VA & Military facilities]
    - Personal Health Insurance
    - Drug Screen
    - Hepatitis A Vaccine
    - Current First Aid Card
    - Proof of U.S. Citizenship
    - Color Vision Test
    - Food Handlers License

Students and Faculty will be informed prior to clinical experience if optional or additional requirements need to be met.

Video Consent Form

VIDEO TAPING RELEASE FORM

I, __________________________________, the undersigned, do hereby consent and agree that Spokane Community College (SCC), its employees, or agents have the right to take videotape recordings of me, during the simulation lab or other lab experience, while I am a student of the Associate Degree of Nursing Program and to use these for the purpose of:

Educational deliberation for the students involved in the video only

I understand that my name and identity will not be revealed therein or by descriptive text or commentary.

I understand that there will be no financial or other remuneration for recording me, either for initial or subsequent transmission or playback.

I understand that the video will be deleted after the participants have had the opportunity to view and discuss the contents with the simulation instructor.

I represent that I am at least 18 years of age, have read and understand the foregoing statement, and am competent to execute this agreement.

Please indicate below with an "X" in the box whether you agree or disagree to be videotaped.

☐ AGREE

☐ DISAGREE

Note: by marking “disagree” I understand that I will not be able to participate, in any capacity, in the simulation scenarios during the simulation clinical lab experience.

By my signature on this document, I acknowledge that I understand the above information regarding videotaping during the simulation lab experience.

SCC Video tape consent 2013-2014hss
Student Clinical Contract  
Spokane Community College  
Nursing Division

To ensure safe nursing practice and accountability for professionalism in the clinical setting, students will meet the guidelines outlined in this contract. Failure to do so will adversely affect the student’s clinical grade and may result in disciplinary action and/or a failure in the course.

Documentation:

Students will document the medical record as per facility policy. Correctly documenting the forms, including proper location and descriptions, are important, as well as obtaining any faculty review or co-signatures as required by the facility. Students may be required to submit their written documentation to their instructor for approval prior to entry in the medical record. Upon instructor approval, the student will then enter the documentation in the medical record.

Clinical Prep Sheet:

The clinical prep sheet is due at the start of clinical and is to be completed as designated by the instructor (note: this may vary based on course and clinical setting). The instructor will review the prep sheet and return it to the students. The completed prep sheet assists students in being prepared to provide safe care to assigned patients.

Preparation for Clinical:

The instructor will give a variety of assignments to facilitate student learning in the clinical setting. These may include but are not limited to: research on a patient diagnosis, medication, or diagnostic test; preparation of a presentation for post conference; and completion of prep sheets including patient assessment data, patient care plan and a concept map. Failure to complete any clinical assignment may result in the student being sent home from clinical and may result in a failure for the course.

Punctuality and Attendance:

Punctuality is expected in the setting as well as a demonstration of professional behavior. Students are expected to be on time and to report to pre-conference or their assigned unit at the time designated by their instructor. If an unexpected event occurs, students should contact the instructor as soon as they determine that they will not arrive on time. At the discretion of the instructor, tardiness may result in the student being sent home from clinical and receiving an unexcused clinical absence.

The student is responsible for notifying the clinical instructor of an absence prior to the clinical start time. Approval of an excused absence is at the discretion of the instructor.
Identification:

Students and faculty must wear their Spokane Community College (SCC) identification badge at all times while in the clinical facility. Identification badges are required to ensure patient and staff security. Students reporting to clinical without proper identification will be sent home for the day and will receive an unexcused clinical absence.

Appearance:

Students must wear the approved SCC uniform. Hair must be tied back, and students must be neat and clean. Students are to refer to the handbook for additional information on appearance. Students are representing SCC while in the clinical setting and are expected to present a professional appearance.

Required Materials and Equipment:

Valuables should be on the student’s person rather than left in a break or report room. Items left in a car should be hidden. Theft does occur and students should secure the belongings to reduce the risk of loss.

Students must bring the following:

- Identification Badge
- Notebook and pen
- Stethoscope
- Watch with second hand or digital second feature
- Penlight
- Bandage scissors (per facility policy)
- Reference books, as needed, if not provided in the clinical setting

Cell Phone Use:

Students are to adhere to the cell phone policy of the clinical facility. Failure to do so may result in removal from the clinical setting.

I have read and understand these expectations. I also understand that this signed document will be placed in my SCC student file.

____________________  ____________________________  __________/
Student Name (print)  Signature  Date

____________________  ____________________________  __________/
Instructor Name (print)  Signature  Date
In the event of an accident or medical emergency, it is the student’s option whether or not to seek medical care or go to an Emergency Department. If the incident involved blood or body secretion contamination, it is recommended that the student immediately obtain an HIV, Hepatitis B, and Hepatitis C determination (testing fees may apply). This can be done through a regular family medical care provider.

*Medical care is the financial responsibility of the student. If a student chooses to seek medical care, go to an Emergency Department, or obtain HIV or Hepatitis testing, the student is responsible for these costs.*

SPOKANE COMMUNITY COLLEGE

NURSING PROGRAM

CLINICAL AGREEMENT

I, the student, understand that it is my responsibility to complete all of the required documentation listed in this agreement in order to participate in a clinical experience. I understand that it is my responsibility to keep a copy of all documentation. I understand that the documentation I submit becomes property of the Spokane Community College Health & Environmental Sciences Division and will not be returned to me or copied for me. It includes:

Clinical Passport Requirements:

- TB Test-Tuberculin Test
- HepB vaccine (or disclaimer)-Hepatitis B; must sign disclaimer until series is completed.
- MMR - Measles, Mumps, Rubella
- Varicella vaccine
- TDaP-Tetanus, Diphtheria, and Pertussis
- Copy of CPR card (American Heart Association Health Care Provider)
- CPNW E-Learning Modules
- Flu or Declination form
- Background authorization forms
- Current medical insurance
- Drug test (if required by the clinical site)
- Orientation modules of specific agencies

Please read the clinical requirements explanation prior to completing them.

I understand that when I attend clinical, I am obligated to follow the college and clinical site policies and that I am to wear appropriate uniform/clothing with an official SCC Clinical ID. I understand that when I attend clinical, I remain a student and am not an employee of the clinical site and am not entitled to any monetary or other remuneration for services performed. I understand that if I am injured or have an incident involving contamination, I am responsible for the cost of any health care services, and I agree to participate in the appropriate follow-up testing as needed. I understand that I am responsible for any medical expenses that may occur me while I am a student at Spokane Community College.

In consideration for Community Colleges of Spokane/Spokane Community College allowing me to participate in the clinical experience, I hereby release Community Colleges of Spokane, Spokane Community College, its Board of Trustees, employees, agents, representatives, and contractors from and
against any and all claims and damages arising out of, or in connection with, my participation in the clinical experience.

I have reviewed this clinical agreement and agree to all of its terms.

Log of Events

Clinical Incident Policy
If there is a clinical incident please notify the course coordinator and Associate Dean of Nursing as soon as you are able. Fill out the Log of Events form and review/follow the below WAC. The Associate Dean of Nursing will notify the commission.

WAC 246-840-513
Reporting and recordkeeping requirements for nursing education programs.

(1) Within two business days, nursing education programs shall report to the commission, on forms provided by the commission, events involving a student or faculty member that the program has reason to believe resulted in patient harm, an unreasonable risk of patient harm, or diversion of legend drugs or controlled substances.

(2) The nursing education program shall keep a log of all events reported by a patient, family member, student, faculty or a health care provider resulting in patient harm, an unreasonable risk of patient harm, or allegations of diversion, and medication errors. The log must include:
(a) The date and nature of the event;
(b) The name of the student or faculty member involved;
(c) The name of the clinical faculty member responsible for the student’s clinical experience;
(d) Assessment of findings and suspected causes related to the incident or root cause analysis;
(e) Nursing education program corrective action; and
(f) Remediation plan, if applicable.

(3) The nursing education program shall use the principles of just culture, fairness, and accountability in the implementation and use of all incident reporting logs with the intent of:
(a) Determining the cause and contributing factors of the incident;
(b) Preventing future occurrences;
(c) Facilitating student learning; and
(d) Using the results of incident assessments for on-going program improvement.

☐ Warning   ☐ Disciplinary action   ☐ Suspension from ___________________________ for ___________________________

Please "✓" one or all that apply to WAC 1320-30- and attach a narrative describing the incident

☐ Academic dishonesty — including but not limited to: cheating, counterfeiting, plagiarism and falsification of records. (210)

☐ Disruption or obstruction — of teaching, administration, disciplinary proceedings, other college activities or authorized non-college activities occurring on campus. (212)

☐ Abuse of self or others — physical abuse, threats, intimidation and/or other conduct, which threatens or endangers the health or safety of any person, including one’s self. (214)

☐ Theft or damage to property — of the college or property of a member of CCS or other personal or public property, on or off campus. (216)

☐ Hazing — engaging in participating in any activity expected of someone joining a group that causes or is likely to cause a risk of mental, emotional and/or physical harm. (218)

☐ Failure to comply with college officials — acting in performance of their duties and/or failure to identify one’s self to these persons when requested to do so. (220)

☐ Unauthorized keys or unauthorized entry — possession, duplication, or use of keys to any college premises, or entry to or use of college premises. (222)

☐ Violation of CCS policy, procedure, rule or regulation — Violation of policies, procedures, rules or regulations of CCS, its colleges and departments. (224)

☐ Violation of law — Violation of any federal, state or local law. (226)

☐ Drugs and alcohol — use, possession, manufacture, or distribution of alcohol or any other controlled substances, and/or drug paraphernalia. (228 and 230)

☐ Firearms and dangerous weapons — including explosives or dangerous chemicals. (232)

☐ Disorderly conduct — lewd or indecent actions, disturbing the peace, or assisting or encouraging another person to disturb the peace. (234)

☐ Unauthorized use of electronic or other devices — making an audio or video record of any person while on campus without his/her prior knowledge, or without his/her consent. (236)

☐ Abuse or theft of CCS information technology — violating any of the computer and electronic information use rules and regulations, including prohibited access into sexually explicit Internet sites. (238)

☐ Abuse of the student conduct system — willful falsification of information or filing fraudulent charges and any other misconduct in regard to the student conduct board or system. (240)

☐ Discrimination — against race, ethnicity, age, sex, marital status, veteran's status, sexuall orientation or disability. (242)

☐ Sexual misconduct — including rape, indecent liberties, assault, voyeurism or unwanted contact. (244)

☐ Harassment — conduct sufficiently severe, pervasive or persistent so as to threaten an individual or limits their ability to work, study or participate in activities of the college. (246)

☐ Stalking — intentionally and repeatedly harassing or following a person and placing them in fear of physical harm to self or property. (248)

☐ Reckless endangerment — conduct that creates an unreasonable risk of harm to another person or property. (250)

☐ Trespassing — Any person who has been given written notice excluding him/her from college property is not licensed, invited or otherwise privileged to enter or remain on college property without explicit written permission by a college official. (252)

☐ Violation of a disciplinary sanction — Violation of any term or condition of any disciplinary sanction constitutes a new violation and may subject the student to additional sanctions. (254)

Nursing course failure/withdrawal form revised 10/01/18
I. I understand that my ability to return to the SCC Nursing Program is contingent upon the available space in the course.

Student Initials: __________________

II. I understand that it is my responsibility to meet all clinical passport requirements to re-enroll in the SCC Nursing Program.

Student Initials: __________________

III. I understand that the theory and clinical portions are not mutually exclusive. Failure of one component of the course requires repetition of all components of the nursing course in the returning quarter.

Student Initials: __________________

IV. I understand that I have a maximum of two years to re-enroll in the program. This two year period begins as of the date of failure from a course.

Student Initials: __________________

V. I understand that two failures/withdrawals in any of the nursing courses will result in a permanent expulsion from the nursing program. Remediation will not be an option.

Student Initials: __________________

VI. I understand that I must contact Wolters Kluwer Customer Service to cancel or put my textbook contract on hold.

Student Initials: __________________

Nursing course failure/withdrawal form revised 10/01/18
STUDENT CONCERNS FORM AND PROCEDURES

Informal Guidelines
For Addressing Student Concerns

The following steps are to be followed by the student when seeking review of an informal concern involving a faculty member of Community Colleges of Spokane. The student is asked to remember:

1. This is an informal process, requiring no paperwork or forms. The intent is to establish a dialogue between the student and the faculty member that results in resolution of the concern.

2. Concern(s) must be initiated within 10 instructional days of the start of the quarter following the quarter during which the alleged action(s) occurred. An informal concern may be initiated in summer quarter if the faculty member and student mutually agree.

3. The review of concern(s) must proceed from the lowest level of review to higher levels of review.

4. The student will make reasonable effort to complete the informal concern process within 20 instructional days. The student has a right, with advance notice, to a supporter* during any meeting.

5. At any point during the informal process the department chair and/or dean may call an informal meeting between the student and faculty to attempt resolution.

6. Group concerns will not be considered.

Step 1: The student communicates with the faculty member with whom they have the concern and describes the concern. The faculty member has 5 instructional days to respond after hearing the student’s informal concern. There is no need for further action if the concern is resolved at Step 1.

Step 2: If the informal concern is not resolved at Step 1, the student next speaks with the faculty member’s department chair. The department chair will first ascertain if the student made attempts to contact the faculty member for step one resolution. If so, then the chair will attempt to facilitate an acceptable resolution between faculty member and student. The chair will have 5 instructional days to respond after hearing the student’s informal concern. There is no need for further action if the concern is resolved at Step 2.

Step 3: If the informal concern is not resolved at Step 2 and or is determined by the faculty member’s dean to be appropriately advanced to this step** the student next speaks with the dean. Upon the dean determining that appropriate steps were followed, the dean will attempt to informally resolve the concern. The dean will respond to the student within 10 instructional days of receiving the concern; the dean will inform the faculty member and department chair of the response. If the concern cannot be resolved at this informal level and the issue warrants formal action, the student may proceed to the Formal Process for Addressing Student Complaints.

Special Circumstances: If at any point during the concern process it’s determined the concern may involve violation of federal/state law or Board policy, the concern may be forwarded to the appropriate office.
*Supporter is a non-employee who provides support to the complaining student but otherwise does not speak or provide legal counsel on the student’s behalf.

**The student may initiate the informal concern directly at Step 3 provided the cause for the student not proceeding through Step 1 and Step 2 is ascertained and found credible by the dean.

**Formal Student Complaint Process**: If a student concern has not been resolved to the student’s satisfaction following the informal resolution process, the student may file a formal complaint utilizing this form. The form must be submitted to the dean’s office within ten (10) instructional days of the dean’s Step Three response. Failure to do so causes the complaint to be denied as untimely.
# FORMAL STUDENT COMPLAINT PROCESS FORM

**Student Complaint**

Date of Dean’s Step Three Response to Informal Student Concern: ____________________________

Date of Student’s Formal Complaint: ____________________________

Student Statement/Complaint:

________________________________________________________

________________________________________________________

________________________________________________________

________________________________________________________

(attach additional pages as necessary)

---

**Dean Intake and Assessment:** The dean assesses the formal complaint and makes a determination of whether the complaint is appropriate for further consideration.

Date the Dean Received the Student’s Formal Complaint: ____________________________

☐ The student’s complaint is **not** appropriate for further consideration.

- Notify the student in writing not later than ten (10) instructional days after receipt of the formal complaint. Attach response to this form. Complaint is terminated and may only be considered further by appeal to Vice President (see below).

Date of Dean’s Determination Notification: ____________________________

☐ The student’s complaint is appropriate for further consideration.

- Within ten (10) instructional days of receiving the formal complaint send a copy to the faculty member and AHE.

Date Dean Forwarded Copy of Complaint to Faculty Member: ____________________________

---

**Faculty Response:** The faculty submits to dean a written response to the formal complaint within ten (10) instructional days of being notified by the dean. Attach written response to form. The faculty can either:

☐ assert the informal process was not followed, or

☐ provide the dean a written response to the complaint.

Date Faculty Member Received Dean’s Notification: ____________________________

Date of AHE Notification: ____________________________

Date of Faculty Member’s Response to Complaint: ____________________________
**Division Response:** A meeting to discuss the complaint and draft the division’s official response is scheduled by dean within ten (10) instructional days of receiving the faculty’s written response. Meeting includes the dean, faculty and AHE representative. Others may participate at the mutual agreement of the dean and faculty.

Date Dean Received Faculty Member’s Written Response: __________________________

Date of AHE Notification: ____________________________________________

Date of Division Response Meeting: ______________________________________

The dean will provide the division’s formal response to the student within five (5) instructional days after the above meeting. Attach the response to this form. This serves as the official division response to the complaint.

**Vice President Appeal:** If the complaint is not resolved to the student’s satisfaction, she or he may appeal to the Vice President within ten (10) instructional days after the division’s response. The Vice President’s response will be attached to this form and serves as the college's final official response to the complaint.

Date Student Filed Appeal to the VP: ____________________________

Date of Vice President Response: ____________________________

Date of AHE Notification: ____________________________
STUDENT SUPPORTER ACKNOWLEDGEMENT

Date: ______________________

To: ____________________________ (Student Name)

From: __________________________ (Name of Employee Hearing Concern)

Subject: Role of Student Supporter in Informal Concern Process and Waiver of Confidentiality

Our college’s student concern process provides the student right to have a supporter present during any meeting, provided advance notice is given to the other participant(s) (i.e. faculty, dean). The purpose of this informal concern process is to informally discuss and hopefully resolve the concern. The supporter’s role in that process is limited to protecting your rights. The supporter does not speak or provide legal counsel on your behalf. You will have to answer any questions directly and your supporter is prohibited from answering on your behalf or otherwise interfering with our discussion. During our discussion your supporter may become aware of your otherwise confidential education information, so your signature below also provides waiver of confidentiality.

If you will have a supporter present please notify me immediately at the following contact number and inform your supporter of the above limitations. I will ask that this form be signed at the beginning of our meeting and will not proceed until that is done.

Contact Number: ______________________

I have read, understand and agree to comply with the above.

_________________________             ________________             ______________________

Student Supporter Signature        Date                Supporter Name (PLEASE PRINT)
BAR CODE MEDICATION ADMINISTRATION (BCMA)

1. **PURPOSE:** To establish preliminary Medical Center policy and procedures for BCMA. BCMA software is a point-of-care solution for validating the administration of medications. Automation of the medication administration process will reduce errors and increase the efficiency of documentation.

2. **POLICY:**
   
   a. BCMA software will be used for documentation of medication administration for all inpatients except when the network is not available.

   b. With the exception of emergent or immediate need situations, a valid provider's order must be present in Computerized Patient Record System (CPRS) prior to the administration of medication or intravenous fluids. In an emergent situation, an order for the medication will be entered as soon as practical.

   c. Only qualified staff, as defined by licensure or scope of practice, will order, dispense and/or administer medications. Nursing students and select Unlicensed Assistive Personnel (UAP’s) may administer medications after completion of BCMA training, assignment of BCMA menu and only under the delegation of their licensed supervisor, nursing preceptor and/or nursing instructor.

   d. BCMA is not intended as a time saving device. The intent of the BCMA software is to provide the nurse with an additional check and balance system that augments but does not replace clinical judgment.

   e. Pharmacy and Patient Care Services (PCS) electronically verify medication orders. These orders then display on an electronically generated Medication Administration Record (MAR) or on paper MAR only as a contingency measure. Medications are not to be given until the medication orders are verified by a pharmacist except in an emergent situation. All medications for verified medication orders will be administered using BCMA unless they meet the emergent/urgent criteria.

   f. Pharmacy verification of medication orders after pharmacy hours will be done remotely by the VA Puget Sound remote pharmacist.

   g. Medication errors must be reported. Medication errors will be considered the result of a chain of events, set in motion by poorly designed/poorly executed processes, procedures, or medication delivery mechanisms. Tracking and trending of errors will assist with process improvements.
2. Numbered Memorandum 118-03-13 September 23, 2013

3. **PROCEDURES:**

   a. Medications will be ordered according to the standard administration times. Clinical judgment and interdisciplinary communication/collaboration is necessary between the prescribing provider, pharmacist, respiratory therapist (RT) and nurse administering the drug. Clinical consideration should be given to the following:

      (1) Patient history of last dose taken prior to admission. Provider will identify first dose in documentation.

      (2) What potential harm a delay in administering a first dose could have (e.g. delay administering an anti-hypertensive, etc)?

      (3) What the effect of the medication would mean for patient safety, comfort or rest if a dose is given at a different time (e.g. diuretic, insulin).

   b. Medications will be administered in a window of time that is no more than 60 minutes before or no more than 60 minutes after the scheduled administration time. Variances (i.e. medications administered outside of these parameters) are often clinically valid and require documentation of a valid comment or reason for the variance in BCMA.

   c. When a patient is transferred between inpatient areas, the electronic MAR should be reviewed and reported by the nurses to avoid omitting dose(s) and/or double-dosing the patient.

   d. All orders to be administered on a routine basis (continuous orders) need an administration time. All "as needed" (prn) orders need a time interval [i.e. every 4 hours (Q4H) PRN] and nurses must document medication effectiveness within four hours of the administration time. By mouth (PO) and Intramuscular (IM) medication effectiveness may be cleared after 30 minutes and Intravenous (IV) medication effectiveness cleared after 15 minutes.

   e. The expiration date/time will be determined by the number of days of treatment (not the number of doses) and will expire at midnight.

   f. The default start time for orders is now, the default administration time is the next dose. Providers will indicate when an additional dose is desired before the next scheduled administration time by checking the box next to “Give additional dose” field in the CPRS medication ordering dialogue or by entering a separate one-time order.

   g. The default stop time for one-time orders is 24 hours.

   h. Acronyms and definitions (Attachment A).
3. Numbered Memorandum 118-03-13 September 23, 2013
   i. Only multi-dose medications (for isolation patients) will be kept in the lock boxes located within patient rooms. Narcotics and single dose medications will not be kept in this location. Only licensed staff and authorized UAP’s with administrative privileges are to have access to the code. If the code is compromised a work order is to be submitted to change the codes for the entire unit.

   j. Missing Dose Requests will be used in limited circumstances during the hours of 1630 thru 0800 daily. Missing Dose Requests are not to be submitted during the hours of 0800 thru 1630 daily (Attachment B).

4. **RESPONSIBILITIES:**
   a. All prescribers are responsible for:
      
      (1) Knowledge of and adherence to correct order processing methods and therapeutic effects of medications.

      (2) Knowledge of standard medication schedules.

   b. Pharmacy is responsible for:

      (1) Knowledge of and adherence to correct order processing methods and therapeutic effects of medications.

      (2) Strict adherence to standard administration times (Attachment C).

      (3) Ensuring that the intent of the physician's order is carried out and completed in a manner compatible with the policies and procedures of this Medical Center.

      (4) Ensuring all medications delivered to the ward for administration to patients will have a machine-readable bar code, package label, and expiration dates.

      (5) Proficiency using BCMA software package.

   c. All Nursing and Respiratory staff administering medications to inpatients are responsible for:

      (1) Knowledge of and adherence to correct order processing methods and therapeutic effects of medications.

      (2) Clarifying any order with the provider if there is any question about the order in relation to the patient's condition, medication history, or when there are other clinically prudent actions/scheduling for a specific medication. Medication administration safety is the top priority.

      (3) Proficiency using BCMA software package.
4. Numbered Memorandum 118-03-13 September 23, 2013

(4) Strict adherence to standard administration times.

(5) Administering medications in such manner as to ensure that the intent of the prescriber’s order is carried out in a manner compatible with the policies and procedures of this Medical Center. Select UAPs will only administer medications as delegated in specific incidences by licensed staff on authorized units.

(6) Adherence to medication administration standards and safety requirements of the BCMA software. Circumventing safety elements of the software, such as unnecessarily bypassing the wristband scan of the patient at the bedside, will lead to preventable errors.

(7) All medication errors and near misses will be reported using the electronic Medication Event Report which is sent to the Patient Safety Manager.

(8) Nurses are responsible for unlocking and removing all unused medications as part of the discharge process. Housekeeping will clean the boxes during their terminal clean of the room.

(a) All multi-dose medications used in the care of isolation patients will remain under lock and key in the patient’s room when not in use. This action is an attempt to reduce cross contamination between patients.

(b) BCMA Coordinator is responsible for: Tracking and trending variance reports for medication administration and providing support for BCMA related issues.

(c) Information Technology (IT) is responsible for:

1. Providing technical expertise for bar code technology including set up, programming, maintenance and troubleshooting for all BCMA related equipment.

2. Ensuring that a sufficient quantity of properly functioning computer hardware including wireless computers, antennae and scanners, suitable for medication administration, are available on each nursing unit.

3. Maintaining a wireless platform that will allow the nurse to log on one time for that specific medication pass and move from patient to patient.

4. Install and maintain the most current version of BCMA and Air Fortress on all BCMA equipment requiring this software.

Missing Dose Flowchart

8 am - 4:30 pm
Do not submit a Missing Dose Request

4:30 pm - 1 am
After Hours Process

Check the Omniscell inventory using the Omni Explorer function to locate in all Omniscell Cabinets

If not available in any Omniscell cabinet, call the Pharmacy Technician

If pharmacy unable to provide:
1. Do not submit missing dose request
2. Chart comment in ICMA - “Med not available”

Check the Omniscell inventory using the Omni Explorer function to locate in all Omniscell Cabinets
If available, do not use Missing Dose function

If unavailable:
1. Submit a Missing Dose Request thru ICMA
2. Call MOD for substitute

Emergency?
No
Yes

Yes

Substitute allowed?

Yes

Proceed to locate in Omniscell

No

Notify the Nursing Supervisor to borrow from another facility

Pharmacy technicians will not missing dose request the next morning

Deaconess Hospital – RHS          Spokane, WA          Page 1 of 3

Policy Title: Medication Administration & Storage

Audience: All Patient Care Units

References and Citations:
ISMP: Acute Care Guidelines for Timely Administration of Scheduled Medications; 2011.
www.ismp.org

PURPOSE: To outline nursing responsibility in administration of medications.

Performed By: Qualified Licensed Personnel (i.e., RN, LPN, RT, ARNP, etc.)

STEPS          KEY POINTS

1. Nurse must be familiar with all medications to be administered to patient prior to administering to said patient. This includes, but not limited to the following:
   1. Onset of action
   2. Pharmacological action
   4. Treatment of potential ADR.

2. Verify the 0 Rights for administration =>
   The 0 Rights:
   Right Patient
   Right Medication
   Right Dose
   Right Time
   Right Route
   Right Indication

3. Medications should be administered within an appropriate amount of time based upon the hospital’s acute care guidelines for scheduled items.

Refer to the table in Step 15. Guidelines are adapted from the ISMP guidelines of 2011.

4. Once removed, the drug must remain with the individual at all times and should not be left unattended. (Security)

Return to Pyxis if not administered within 30 minutes.

5. The drug should not be left on or in any area exceeding 80 degrees, including in pockets. (Storage)

Original Effective Date: 10/1/1977          Revision Date: 7/28/2016

</tr>
</thead>
<tbody>
<tr>
<td>6. eMAR must be used to select and administer all medications.</td>
<td>Review eMAR at beginning of each shift. Verify each order has been double checked or acknowledged.</td>
</tr>
<tr>
<td>7. Read medication order on eMAR/Dr. Order in its entirety, including allergies.</td>
<td>Note route, dose and make certain that frequency and time schedules correspond. Some medication (i.e., heparin) and some patient care units (i.e., NICU); require that all medication dosages and administration times be double checked with another licensed nursing personnel.</td>
</tr>
</tbody>
</table>
| 8. **Identify the patient by scanning the wristband or by using 2 patient identifiers:**  
  1) Name  
  2) Date of Birth | Wristband must be attached to patient. |
| 9. Ask patient and review allergy band for any medication allergies. | To prevent known allergic reaction to any medication. |
| 10. When administering medications, do not remove the medication from unit dose package until in patient's room. Scan the medication to be administered. May place in medication cup and hand to patient. | Scanning provides for proper identification of medication at patient’s bedside. Check for expiration date. |
| 11. **Administer Medication:**  
  a. If oral medication, remain with the patient until it has been swallowed. | Never leave medications at bedside except as specifically ordered by physician. |
| 12. Dispose of equipment needles and syringes in proper receptacles. | To prevent puncture injury to self / patient / family. DO NOT RECAP NEEDLES |
| 14. **Documentation:** eMAR | |

Nursing Students and Nursing Technicians: Access and Administration of Medications

POLICY STATEMENT:

Providence Sacred Heart Medical Center and Providence Holy Family Hospital ensure all Nursing Students, Nursing Senior Practicum Students, and Nursing Technicians comply with all applicable federal and state laws and regulations.

Nursing Students, Nursing Senior Practicum Students, and Nursing Technicians perform tasks and functions within the limits of their education, up to their skills and knowledge, as verified by their nursing program and supervising nurse.

Nursing students administer medications under the supervision of the clinical faculty or the supervising nurse employed by the hospital.

DEFINITIONS:

Nursing student personnel: Includes Nursing Students, Nursing Senior Practicum Students, and Nursing Technicians:

- **Nursing students**: Individuals enrolled in an nursing educational program in the United States or its territories that is approved by the National Council Licensure Examination-RN. Nursing students will be at hospital completing a clinical experience.
- **Nursing senior practicum students**: Individuals enrolled in a nursing educational program who are assigned to a practicum experience on a designated unit as a final clinical experience prior to graduation.
- **Nursing technician**: A nursing student employed by the hospital, who holds a current Nursing Technician license, and working under the supervision of an employed hospital registered nurse.

Direct supervision: The licensed RN who provides guidance to nursing personnel and evaluation of nursing tasks is on the premises, is quickly and easily available, and has assessed the patient prior to the delegation of the duties.

Immediate supervision: The licensed RN who provides guidance to nursing personnel and evaluation of nursing tasks is on the premises, is within audible and visual range of the patient, and has assessed the patient prior to the delegation of duties.
Immediately available: An RN who has agreed to act as supervisor to the nursing student, is on the premises, and is within audible range and available for immediate response as needed. This may include the use of two-way communication devices which allow conversation between the nursing student and RN.

Clinical Faculty: An RN working in conjunction with a nursing school who has agreed to act as a supervisor to a nursing student or nursing senior practicum student.

Supervising Nurse: The RN employed by the hospital who has agreed to act as supervisor is on the same patient care unit as the nursing technician and the patient has been assessed by the RN prior to the delegation of duties to the nursing technician.

Primary Care Nurse: The RN who is responsible for providing all nursing care to the hospitalized patient.

High Risk Medications: High risk medications include the following:

- All heparin, warfarin, t-PA, low molecular weight heparin, bivalirudin, dabigatran, and other anticoagulants
- All insulin formulations. This includes both SQ and IV insulin doses and all Insulin IV infusions.
- IV Sodium Chloride at concentrations greater than 0.9% (normal saline).

IMPLEMENTATION:

1. There are some medication administration and monitoring skills that Nursing Student Personnel are not permitted to perform. These include the following situations:
   a. Confirm, release, or acknowledge medication orders in the electronic medication administration record
   b. Administer medications that are not confirmed or acknowledged in the electronic medication administration record
   c. Administer oral or parenteral chemotherapy
   d. Administer oral or parenteral controlled substances
   e. Administer conscious sedation or assume monitoring responsibility for patients undergoing procedural sedation
   f. Administer or adjust oxytocin for laboring or postpartum patients
   g. Administer or adjust medications that require advanced training (e.g., medications restricted to the critical care areas)
   h. Administer medications via an epidural or spinal catheter
   i. Peer check any medication dosing

2. In addition to the above functions, nursing technicians are not permitted to perform any of the following tasks:
   a. Administer or adjust IV medications
   b. Any task that does not appear on the verification sent to the hospital by the nursing program in which the nursing technician is enrolled.

3. Accessing electronic programs used to support medication administration (e.g., automated dispensing cabinets, electronic medication administration records):
   a. Access to the electronic medication administration record is granted to nursing student personnel.
b. Access to the automated dispensing cabinets is granted to nursing senior practicum students, clinical faculty, and nursing technicians.

c. Schools provide Educational Services Coordinator with the following information to obtain access to the applicable programs:
   i. Last name, first name, middle initial
   ii. Last four digits of the social security number
   iii. Name of facility and unit where student is placed
   iv. Start and end dates for clinical experience
   v. Type of clinical experience (nursing senior practicum student or nursing student)

4. Prior to access and using the electronic medication administration record or the automated dispensing cabinet, the nursing student personnel complete required training.

5. Obtaining Medication Administration Supplies:
   a. Nursing student personnel may obtain necessary medication administration supplies by accessing medication rooms and/or supply rooms.

6. Obtaining Medications:
   a. Nursing students obtain medications directly from their Supervising Nurse.
   b. Nursing senior practicum students and nursing technicians access the automated dispensing cabinets to obtain medications for patients.

7. Administration of Medication by Nursing Student and Nursing Senior Practicum Students
   a. Nursing student and nursing senior practicum students utilize the electronic medication administration record to correctly identify patient, medication, and document medication administered.
   b. Nursing students and nursing senior practicum students administer medications under the immediate supervision of the clinical faculty until deemed competent to administer medications. Nursing student and nursing senior practicum student competency is determined by the clinical faculty.
   c. Once deemed competent in medication administration, the nursing student and nursing senior practicum student may administer medications with supervision by the patient's primary care nurse or clinical faculty nurse who is immediately available. (See exceptions below related to High Risk Medications).
   d. Prior to administering medications the nursing student/nursing senior practicum student must complete the following. If there are questions or concerns the nursing student/nursing senior practicum student must address the concerns with the clinical faculty nurse or the patient's primary care nurse.
      i. Verify that there are no contraindications present
      ii. Verify the medication is being administered at the proper time, in the prescribed dose, and by the correct route. This includes a review of pertinent labs.
      iii. Address any unresolved concerns with the prescriber and/or staff involved with the patient's care.
      iv. Verify the medication selected matches the medication order and product label
v. Visually inspect the medication for particulates, discoloration, or other loss if integrity

vi. Verify the medication has not expired

vii. Inform the patient or family about any potentially clinically significant adverse drug reactions or other concerns regarding a new medication.

e. Administration of High Risk Medications

a. The clinical faculty or primary care nurse obtains the high risk medication for the nursing student/nursing senior practicum student.

b. The nursing student/nursing senior practicum student and the clinical faculty/primary care nurse review specific items addressed above (d i - vii) to ensure the high risk medication is appropriate for the patient.

c. The nursing student/nursing senior practicum student administers the medication under the immediate supervision of the clinical faculty/primary care nurse. The immediate supervision of the medication administration is documented in EPIC as a "requested" co-signature.

8. Administration of Medication by Nursing Technicians with supervision by nurse:

a. Nursing Technicians function only under the direct supervision of an employed registered nurse who has agreed to act as supervisor and is immediately available.

b. Nursing technicians utilize the electronic medication administration record to correctly identify patient, medication, and document medication administered.

c. Nursing technicians administer medications under the immediate supervision of the supervising nurse until deemed competent to administer medications.

d. Once deemed competent in medication administration, the nursing technician may administer medications under direct supervision by the supervising nurse.

e. Nursing Technicians administer medications only after the medication administration task has been delegated to them by the supervising nurse.

i. Prior to delegating the medication administration task, the supervising nurse must:
   - Verify that there are no contraindications present
   - Verify the medication is being administered at the proper time, in the prescribed dose, and by the correct route. This includes a review of pertinent labs.
   - Address any unresolved concerns with the prescriber and/or staff involved with the patient's care.

ii. Prior to the medication administration task, the Nursing Technician must
   - Verify the medication selected matches the medication order and product label
   - Visually inspect the medication for particulates, discoloration, or other loss if integrity
   - Verify the medication has not expired
   - Inform the patient or family about any potentially clinically significant adverse drug reactions or other concerns regarding a new medication

f. Administration of High Risk Medications.

i. The primary care nurse obtains the high risk medication for the nursing technician.
ii. The nursing technician and the primary care nurse review specific items addressed above (8.e. i-ii) to ensure the high risk medication is appropriate for the patient.

iii. The nursing technician administers the medication under the immediate supervision of the primary care nurse. The immediate supervision of the medication administration is documented in EPIC as a "requested" co-signature.

9. Medication Errors:
   a. Following the discovery of a medication error, or in the event that Nursing Student Personnel is involved in a medication error, the Nursing Student Personnel notifies:
      i. Patient's Primary Care Nurse
      ii. Supervising Nurse
      iii. Clinical Faculty. Note: Nursing Technicians do not report to a Clinical Faculty member.

10. The Nursing Student Personnel completes an on-line event report (e.g., Quantrros) together with the Supervising Nurse or Patient's Primary Care Nurse.

11. The Student Nurse must also complete any additional reporting requirements as defined by their School of Nursing.

**RATIONALE:**

To provide consistency in accessing and administering medications by Nursing Student Personnel and ensure compliance with applicable hospital policies and Washington State Law.

**Policy Number#: 1-149**

ROCKWOOD HEALTH SYSTEM

STUDENT AFFILIATION AGREEMENT: ADDENDUM 1

Patient Care Duties To Be Provided By Students

(HOSPITAL TO COMPLETE LIST OF DUTIES AND ATTACH)

TYPE OF PROGRAM: Undergraduate Nursing Program. Patient Care Clinical rotations including Medical/Surgical Critical Care, Emergency Department, Outpatient areas, Operating Room, Preoperative area, PACU/Recovery room, Obstetrics, labor and Delivery, Neonatal Intensive Care Unit, IV Therapy, Hemodialysis and HY@rbano/Wound Center.

ACADEMIC LEVEL: Undergraduate degree program clinical rotation

EXPERIENCE LEVEL:

Beginner/Basic: 1st year nursing students (Med/Surg, OB and Surgical rotations)

Experienced: Level 2nd year nursing students (continued Med/Surg, Critical Care and other specialty areas)

Advanced: Senior level nursing students in capstone or Senior Practicum experiences - assigned to specialty areas by student request and with the consent of the Unit manager - assigned to an RN preceptor for direct supervision.

DUTIES TO BE PERFORMED:

Beginner Assessments. Basic head to toe assessments of patients under preceptor or instructor supervision, as appropriate to admission or shift assessments, vital signs and other data collection necessary for patient care. Documentation of assessments within electronic medical record or co-signed by nurse preceptor.

Planning of nursing care. Under supervision of Preceptor and/or instructor, identify elements of the plan of care specific to the patient as relevant from data collection within the medical record and through assessments.

Implementation of nursing interventions. Implement nursing interventions and treatments as defined by the plan of care and with the care area standards of the nursing unit. Interventions that are nurse driven are defined by the focus of care. For example, an assessment of a high risk for skin breakdown will identify a plan of skin care and positioning to reduce the chance of skin breakdown, which defines a number of skin care interventions and frequent repositioning and reassessment of skin condition for the patient. Interventions that require a Dr's order, including medication administration, restraints, insertion of Foley catheters, IV starts, etc. are done at the appropriate level of training as defined by the nursing course objectives and with the competency assessed by the instructor.

Evaluation of interventions. Evaluation of the effectiveness of the interventions requires a reassessment process appropriate to the level of the interventions implemented by the student nurse and preceptor.

Experienced. Nursing care of patient. Title role of RN. Under the supervision of a staff preceptor RN. Management of IV's, medication administration and nursing procedures progressively increase, dependent on training level and ongoing experience and competencies determined by the clinical instructor.
STUDENT AFFILIATION AGREEMENT-ADDENDUM 2

The Following Patient Care Duties Cannot be Provided By Students

(HOSPITAL TO COMPLETE LIST OF DUTIES NOT TO BE PROVIDED AND AT EACH)

No prescribing of medications to patients that is to be dispensed outside of the hospital
No administration of chemotherapeutic agents
No administration of blood products
No administration of N. Push medications
No signing of legal documents
Student Agreement for Use of Practice and Invasive Kits

I _____________________________________________ have read and understand my ethical responsibilities as outlined in the American Nurses Association Code of Ethics for Nurses (refer to the last page of this document for the Code) and the Invasive Procedure Protocol. In accordance with these principles I agree to use kits intended for practice on mannequins, only on those mannequins and on equipment intended for that purpose. I also agree to use invasive kits for peer practice, on my peers only and in the presence of a SCC instructor only. I understand that the intentional misuse of this equipment will be considered unethical conduct and such conduct will be brought before the faculty for disciplinary action.

I understand the risks/discomforts and benefits of invasive procedure practice and my questions have been answered. I agree to participate as a subject in these optional learning experiences. (Check all that apply.)

☐ Intradermal injections
☐ Intramuscular injections
☐ Subcutaneous injections
