Hybrid Paramedic Program

CWU is responsive to the needs of the experienced working EMT and wanted to develop a program that allows you to work and get your paramedic certification around your schedule with Online learning combined with a live course.

This course is fast paced and intense educational experience and not designed for the new EMT, but for experienced EMT's working in an ALS system. You can gain your paramedic certification and work towards your bachelor's degree after completion.

This allows the student to watch live content presentations. This course is 2 days a week with 1 day online live classes and 1 day will be held at one of our CWU campus sites and will be 4-5 hours of didactic live education in the morning, followed by an intense lab with hands on scenarios following what was learned that week in class.

CWU follows the new style of Flipped Classroom learning promoted by Dr. David Page and approved by CoAEMSP's and CAAHEP. This allows students to watch the content of lectures at home and spend time in class discussing deeper concepts and practicing real life scenarios to help engrain the knowledge into our students. This proven success formula has been parlayed into a fantastic Paramedic course and has proven results.

Our Hybrid Program is only offered in Spring Quarter start and will be 2 quarters of intense didactic training in Spring and Summer quarters. This will also include riding at departments to acquire and practice new learned skills. Fall quarter will consist of Clinical Hospital Rotations and Capstone ride time out in the field. Usual competition is 10-11 months from start of class.

Currently campus locations are at Edmonds Community College and Spokane Community College, WA.
